What pro-businesscenter.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This French-language website presents Pro Business Center as a Tunisian business-services provider offering company formation, business domiciliation, office rental, and related administrative, legal, and accounting assistance, with prospective clients directed toward service information and quotation requests.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional corporate-services landing site: analysis found no login form, credential-harvesting mechanism, hidden sensitive form, wallet functionality, or apparent brand-impersonation pattern. However, this benign presentation is outweighed by a confirmed blacklist hit and multiple external malicious or suspicious detections associated with the domain. The separate abuse reports concern a shared provider IP, so they do not independently establish that the website caused those reports; nevertheless, the domain-level blacklist and malicious detections constitute a material contradiction requiring a security-forward posture. No conflicting legal-entity names or explicit impersonation indicators were observed.

EVIDENCE

- The homepage contains one contact/quote-request form and no password or sensitive-data form; behavioral testing detected no hidden forms, wallet activity, clipboard manipulation, or cloaking.
- External reputation monitoring recorded a confirmed blacklist hit, two malicious detections, and one suspicious detection for the assessed domain.
- The domain was registered on 2013-03-04 and is approximately 13.47 years old.
- Historical records contain 125 archive snapshots spanning 2013–2026, with 14 years tracked.

Regulatory Verification Notes

The site describes company formation, domiciliation, office rental, and associated administrative services in Tunisia, but the available material does not state a licensing authority or license number. This is a regulatory-transparency gap rather than proof of misconduct, but it is significant because the advertised services may involve legal, corporate, or accounting processes. The operator's real-world identity is only likely connected to the site and is not independently verified by the available evidence. A third-party broker dataset produced no match; that result is contextual only and does not constitute a licensing determination.

EVIDENCE

- The service and pricing navigation identifies pages for company creation, company domiciliation, office rental, tariffs, specifications, FAQ, and contact requests, without a stated license number or licensing authority.
- The site is served from AS16276, operated by OVH - OVH SAS, FR.
- The site's transport encryption uses a DV certificate issued by YE2, valid to 2026-11-14.

What to Verify Next

Before any sensitive engagement, an independent party should confirm the operator's legal name, Tunisian business registration, physical operating address, and authority to provide the specific corporate or accounting services advertised. Any quotation, advance payment, document submission, or appointment should be validated through an independently sourced channel, with payment protections and contractual terms reviewed before commitment.

EVIDENCE

- The contact page provides a quote-request route and publishes telephone, WhatsApp, and form-based contact options.
- The site contains dedicated FAQ, tariffs, and service-description pages that can be compared against independently obtained corporate and regulatory records.
- The homepage links to LinkedIn and Facebook profiles that may support independent cross-checking of the claimed business presence.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction at this time**. The professional appearance and stable technical presentation do not offset the confirmed external reputation contradictions, and

the available evidence does not establish sufficient confidence for credential, document, payment, or other high-impact engagement.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, with the observed edge address associated with AS16276 and OVH - OVH SAS, FR; the origin server was not observable in this analysis. This infrastructure provides a mitigating layer against direct origin exposure, but it is not evidence that the operator or website content is legitimate.

Closing Assessment

Interaction should remain limited to passive review until the independent identity, regulatory, and reputation checks above produce satisfactory results; credentials, sensitive documents, and financial transactions should not be submitted in the interim.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 6 reports on hosting IP 92.222.139.190 (OVH Hosting Limited, Content Delivery Network), 18% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%
Trusted social count=2	

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pro-businesscenter.com.

- The request stayed on pro-businesscenter.com. It was not redirected to another domain. CLEAR
- Registration is published under OVH, SAS. CLEAR
- DNS for this domain is served by ovh.net, across 2 name servers. NOTED
- The registration is paid up to 2027-03-04. NOTED
- The earliest public archive of this site is from 2013-04-01. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pro-businesscenter.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
