

Is pro-orthoindia.com legit? TrustSniffer's high-trust assessment: 100/100

pro-orthoindia.com

Verdict

100

OUT OF 100

HIGH TRUST

pro-orthoindia.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Commercial website for Pro-Ortho Perfect India Pvt. Ltd. describing prosthetic and orthotic services, technology used, company offices in Thane and Pune, contact numbers, email addresses, and a form for free consultation. Focused on patient services, product lists and clinic information.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a regional healthcare and rehabilitation service site for Pro-Ortho Perfect India, presenting prosthetic and orthotic care, clinical evaluations, custom insoles and footwear, patient resources, clinic information, and consultation services for visitors in the Thane and Pune area.

Scam/Impersonation Risk

No contradictions were observed. The homepage and service content present a coherent medical-services model rather than a financial, cryptocurrency, gambling, or credential-harvesting operation; the site contains no login form, hidden form, wallet-connection mechanism, or detected brand-impersonation indicator. Available external reputation checks produced no malicious or suspicious findings, supporting the authoritative low-risk assessment. The website appears legitimate and established on the available evidence, although the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage identifies a corporate healthcare/service presentation focused on prosthetics, orthotics, clinical evaluation, custom footwear, and patient consultations, with no detected scam-content indicators.
- The contact and enquiry functionality consists of a contact or callback form without a sensitive credential field or untrusted submission destination.
- Registered 2022-02-02 (~4.55 years old) through GoDaddy.com, LLC; the registration record lists Registration Private and Domains By Proxy, LLC.

Regulatory Verification Notes

The site identifies the business as Pro-Ortho Perfect India Pvt. Ltd. and describes offices in Thane and Pune, with telephone contact details, clinical services, technology information, and company pages. The supplied pages do not present a license number, licensing authority, or registration reference; this is a verification and disclosure gap rather than evidence of deception. Registration privacy is an administrative limitation, and the available evidence does not establish the operator's identity independently. The site uses a domain-validated TLS certificate, which protects transport confidentiality but does not itself verify the healthcare provider or its regulatory standing.

EVIDENCE

- The About, company, and contact content names Pro-Ortho Perfect India Pvt. Ltd. and describes locations in Thane and Pune.
- The service pages describe prosthetic and orthotic treatment, device provision, clinical evaluation, and consultation processes without presenting a licensing authority or license number.
- TLS is valid, issued by YR2 at DV validation level, with validity to 2026-10-01 09:06:24 UTC.

What to Verify Next

Before credential or payment interactions, an organisation considering engagement should independently confirm the company's legal identity, clinic locations, and contact channels through an offline or independently sourced route. Where the engagement involves regulated healthcare provision or device supply, the relevant Indian registration, professional credentials, and applicable medical-device or facility authorisations should be checked with the responsible registry. For purchases or deposits, payment methods should provide ordinary transaction records, refund terms, and payment-protection mechanisms.

EVIDENCE

- The contact page provides telephone numbers, email contact details, office information, and a consultation enquiry path that can be cross-checked independently.
- The About, technology, process, and awards pages provide the site's principal identity and service claims for comparison with external corporate or professional records.
- The products and consultation pages describe patient appointments, device sales, and related clinical services, making merchant identity and transaction terms the relevant pre-engagement checks.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate healthcare-services website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or conflicting-identity signal was observed, while independent confirmation of the real-world operator remains incomplete.

Infrastructure Integrity

The site resolves to one likely origin address in the United Kingdom and is hosted by WHG-IN – WHG Hosting Services Ltd on AS199404. No CDN or WAF vendor was detected, so the infrastructure provides a direct hosting posture rather than the additional edge-layer mitigation associated with a major CDN; this is an architectural characteristic, not evidence of malicious activity.

EVIDENCE

- Served from AS199404, WHG-IN – WHG Hosting Services Ltd, GB; the resolved address is 209.42.28.104.
- Infrastructure resolution reports one unique IP, zero edge IPs, and one likely origin IP, with no detected CDN.

Closing Assessment

Engagement is proportionate for ordinary healthcare-service enquiries, subject to independent confirmation of the provider’s identity, applicable credentials, and payment protections before sensitive information or funds are exchanged.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pro-orthoindia.com.

- The request stayed on pro-orthoindia.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by mysecurecloudhost.com, across 4 name servers. NOTED
- The registration is paid up to 2027-02-02. NOTED

- The earliest public archive of this site is from 2024-03-21. CLEAR
- It is hosted on WHG-IN, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pro-orthoindia.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
