- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2006.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Proactive Investors is a UK-focused financial news and investor-information platform presenting market coverage, public-company analysis, fund and sector reporting, cryptocurrency content, videos, events, subscriptions, and personalized user features for an investment audience.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed malicious reputation findings were observed. The homepage presents an information and media model rather than requesting deposits or promising investment returns directly; the available analysis also found no sensitive login form, hidden form, wallet connection, or deceptive transaction mechanism. The site therefore presents no evidence of scam or impersonation risk.

- The homepage contains substantive financial-news and investor-information content with no reported red flags.
- The homepage analysis found no sensitive form, hidden form, external password form, or wallet-connection activity.
- External reputation checks recorded zero malicious and zero suspicious detections.

Regulatory Verification Notes

The legal and policy material presents a coherent publisher identity, contact information, and standard site policies. No regulated financial-service license is claimed in the supplied site material; for this information-led business model, that is a transparency point requiring contextual verification rather than evidence of misconduct. The domain's long continuity, established registration, and valid transport security materially support the site's legitimacy.

- The legal and contact pages provide publisher identity, contact information, and standard policies.
- Registered 2005-12-15 (~20.65 years old) through GoDaddy.com, LLC.; expiration 2027-12-15.
- 5,000 archive snapshots spanning 2006-10-04 to 2025-11-08, covering 20 tracked years.
- Hosted on AS16509 (Amazon.com, Inc.); TLS certificate issued by Amazon RSA 2048 M01 (DV), valid to 2027-01-29 23:59:59 UTC.

What to Verify Next

Institutional onboarding should confirm the publisher’s legal entity and any permissions relevant to the specific subscription, event, or commercial relationship through the applicable official registry. Standard review should also confirm that contact and subscription terms remain consistent with the published legal and policy pages.

- The legal and policy pages are the relevant sources for entity, terms, and disclosure review.
- The homepage identifies subscriptions and investor events as commercial engagement channels.
- The site provides standard policy and contact material for comparison during onboarding.

Summary Verdict

The overall posture is legitimate, established, and trustworthy, with no observed scam or impersonation contradiction. Convergent historical, editorial, reputational, and technical evidence supports normal interaction, including account login and standard use.

Infrastructure Integrity

The site is protected by a CDN/WAF architecture using Amazon.com, Inc. infrastructure, with the observed address serving as an edge endpoint rather than an exposed origin. This protective configuration mitigates direct infrastructure exposure but is appropriately treated as a supporting control, not standalone proof of legitimacy.

- Observed edge address: 75.2.115.82.
- CDN/WAF protection was present, with no likely origin address identified.
- Hosting infrastructure: Amazon.com, Inc., US.

Closing Assessment

Prospective users may proceed with normal use, while institutions should apply their ordinary onboarding and relationship-specific control checks.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of proactiveinvestors.co.uk.

- The request stayed on proactiveinvestors.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. [Tag = GODADDY]. CLEAR

About this assessment

A trust score summarises the evidence TrustSniffer could collect about proactiveinvestors.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
