

Is probacons.com legit? TrustSniffer's high-trust assessment: 99/100

probacons.com

Verdict

99

OUT OF 100

HIGH TRUST

probacons.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

PROBACONS corporate website presenting a catalogue of concrete-related products and services (additives, sealers, mortars, repair, decorative finishes), company information, contact details and a blog. The site is informational and commercial; there are no login, payment flows, investment claims, or credential-harvesting indicators visible in the page text provided.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

PROBACONS is a corporate commercial website for a concrete-products supplier and applicator, presenting products such as additives, sealers, mortars, repair materials, decorative finishes, flooring systems, and related protection, repair, design, and decoration services for business and consumer customers.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other contradictory signals were observed. The site's homepage and product catalogue describe a coherent concrete-products and services business, provide commercial contact information, and link to Facebook, Instagram, and WhatsApp rather than presenting credential, investment, or cryptocurrency functionality. Behavioral inspection detected hidden forms on two runs, but no password forms, external sensitive-data forms, wallet activity, cloaking, clipboard manipulation, or suspicious scripts were identified; this is a limited implementation anomaly rather than evidence of an impersonation pattern. Available reputation checks found no malicious or suspicious detections, and no broker-warning match was present.

EVIDENCE

- The homepage presents the PROBACONS brand, concrete products, concrete services, company information, and contact pathways.
- Behavioral inspection recorded hidden forms on 2 of 2 runs, with 0 password forms sent to external destinations and 0 wallet-provider or wallet-drainer events.
- Available external checks recorded 0 malicious detections, 0 suspicious detections, and no confirmed blacklist or phishing match.
- Historical archive records show first observation on 2002-04-02 and last observation on 2025-08-07, with 24 years tracked.

Regulatory Verification Notes

The site's apparent business model is the sale and application of concrete-related products, supported by product descriptions, service categories, contact details, and a blog. No financial-services activity or regulated investment offering is presented, so no financial license claim is evidenced on the supplied pages. The available evidence is consistent with an established, apparently legitimate commercial website, but the real-world operator identity is not independently verified. The absence of a matched third-party broker record is contextual reputational information only and is not a licensing or regulatory determination.

EVIDENCE

- WHOIS records show registration on 2009-04-22 through HOSTINGER operations, UAB, with expiry on 2027-04-22; the domain is approximately 17.34 years old.
- The site is hosted on AS47583, operated by AS-HOSTINGER - Hostinger International Limited, CY.
- The site's TLS certificate is issued by YE1, uses DV validation, and is valid through 2026-11-11.
- The homepage contains concrete product and service categories, company information, contact details, and social links, but no financial license number or regulated-service authorization claim.

What to Verify Next

Before a commercial purchase or contract, the prospective counterparty should independently confirm the legal trading entity, physical business details, applicable product warranties, return or remediation terms, and the beneficiary of any payment. If the engagement involves a regulated activity outside the site's stated concrete-products business, the relevant regulator's public register should be checked directly. Payment should use a method offering appropriate transaction protection, and published contact channels should be confirmed through an independent source before sensitive information is exchanged.

EVIDENCE

- The contact page and homepage provide channels for commercial inquiries and should be matched to independently obtained business details.
- The catalogue and service pages describe product sales, project work, and concrete-related services rather than financial products.
- No login, payment, investment, or credential-collection flow was visible in the supplied page content.

Summary Verdict

Available evidence supports a **high-trust, low-risk posture** for the apparent PROBACONS commercial website. Its coherent business content, long-running domain presence, clean available reputation signals, stable operation, and valid transport encryption are consistent with an established site, while operator identity remains likely rather than independently proven.

Infrastructure Integrity

The site resolves directly to Hostinger infrastructure rather than a detected CDN edge, with four likely origin addresses and no identified CDN or WAF vendor. This provides ordinary hosting stability but limited intermediary protection; infrastructure therefore serves as a supporting technical signal, not proof of business legitimacy.

Closing Assessment

Normal browsing and ordinary commercial evaluation are proportionate, while credential or payment interactions should follow independent merchant-identity, terms, and payment-protection checks before commitment.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of probacons.com.

- The request stayed on probacons.com. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-22. NOTED
- The earliest public archive of this site is from 2002-04-02. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about probacons.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
