- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

ProFinance.ru is a Russian-language financial news and market-data portal presenting foreign-exchange rates, commodity and macroeconomic coverage, market charts, archives, forum and messaging features, and data/API services; its apparent business model is informational publishing supported by advertising and paid data access.

Scam/Impersonation Risk

No blacklist, phishing, impersonation, malicious-detection, or conflicting-identity signal was observed. The homepage behaves as an editorial market-information service rather than a credential-collection or transaction interface: testing identified no login form, sensitive form, hidden form, wallet connection, or clipboard-interception behavior. The site's long registration continuity and clean external reputation are consistent with an established online publication, although the real-world operator remains independently unverified.

EVIDENCE

- The homepage presents Forex rates, commodity prices, market headlines, charts, archives, and API/data access without a login or sensitive submission form.
- The domain was registered on 2002-07-22 and is approximately 24.07 years old.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit for the domain.

Regulatory Verification Notes

The site presents financial news, rates, commentary, charts, and data services rather than a clearly identified regulated brokerage or investment-taking operation. No license, licensing authority, or registration number is claimed in the supplied site analysis; this is a regulatory-disclosure gap requiring confirmation if a proposed service involves regulated activities, but it is not evidence of a scam in the absence of contradictory signals. Available evidence otherwise supports an established, apparently legitimate publication, including a strong global traffic footprint, a recognized corporate registrar, and valid transport encryption.

EVIDENCE

- The homepage is classified as “News / Market data” and “Informational,” with no identified red flags.
- The domain registrar is RU-CENTER-RU.
- The site is served from AS8342, RTCOMM-AS - JSC RTComm.RU, RU.
- The TLS certificate uses DV validation, is issued by YE2, and is valid to 2026-09-12.

What to Verify Next

Before credentials or payment details are provided, independently confirm the operator responsible for any account, data, advertising, or paid-service relationship. Where a proposed service could constitute regulated financial activity, confirm the applicable authorization directly with the relevant regulator; separately review service terms, cancellation or return provisions, and available payment protections through an independent channel.

EVIDENCE

- The supplied analysis does not independently connect the website to a verified real-world operator.
- The site analysis identifies no claimed license authority or license number.
- The site describes monetization through advertising and paid data/API access, making the applicable commercial terms relevant to any paid engagement.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam or impersonation contradiction was observed, but the operator’s real-world identity is not independently verified; legitimacy should therefore be treated as evidence-consistent rather than proven.

Infrastructure Integrity

The site resolves to one likely origin address with no detected CDN or WAF layer. Its hosting is provided by RTCOMM-AS - JSC RTComm.RU in Russia, and the direct infrastructure posture does not provide the distribution and edge-layer mitigation associated with mainstream CDN deployment; this is a technical consideration, not evidence of illegitimacy.

EVIDENCE

- Hosting infrastructure: AS8342, RTCOMM-AS - JSC RTComm.RU, RU.
- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- No CDN was detected.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; before credential or payment interactions, independent confirmation of the responsible operator, applicable terms, and payment protections remains appropriate.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about profinance.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
