

Is programme-tv.net legit? TrustSniffer's high-trust assessment: 90/100

programme-tv.net

Verdict

90

OUT OF 100

HIGH TRUST

programme-tv.net appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 75%.

What this site appears to be

Télé-Loisirs page providing TV schedules, editorial news, program filters and related entertainment articles. Contains social links and advertising placements; no evident financial or credential-harvesting behavior.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is an established French entertainment and television-information portal presenting TV schedules for terrestrial, cable, satellite and streaming services alongside television, cinema, series, celebrity and lifestyle news. Its apparent business model is free editorial publishing supported by advertising, promoted placements, application downloads and possible subscription or account features.

Scam/Impersonation Risk

No scam, phishing, impersonation, or identity contradictions were observed. The homepage presents a coherent editorial-media model, links to social profiles associated with the Télé-Loisirs name, and contains no sensitive forms, wallet-connection behavior, credential-harvesting mechanism, or financial-service offer. Two suspicious inline scripts and four console errors were observed during behavioral testing, but these were not accompanied by hidden forms, external password submission, cloaking, wallet activity, or other abuse indicators; they therefore remain limited technical anomalies rather than evidence of deceptive intent. The domain also has a long, continuous history and a top-tier global traffic footprint, supporting the conclusion that the site is apparently legitimate, while the real-world operator identity is not independently verified.

EVIDENCE

- The homepage provides TV listings, editorial news, cinema and series content, and entertainment guides; no sensitive form or credential-harvesting behavior was observed.
- The homepage links to Facebook, X and Instagram profiles associated with Télé-Loisirs, with no brand-impersonation indicator detected.
- The domain was registered on 2002-10-06 and is approximately 23.88 years old, according to registration continuity evidence.
- Historical coverage records 5,000 archive snapshots from 2002-11-21 through 2020-11-05, spanning 19 tracked years.

Regulatory Verification Notes

The site's apparent activity is informational publishing rather than investment, brokerage, lending, or another inherently regulated financial service. No financial license claim or registration number was identified in the reviewed page content; for this business model, that is a transparency item for any subscription, account, or paid offering rather than evidence of a scam. The available evidence is consistent with an established, apparently legitimate website, but it does not independently prove the legal entity operating the service. External reputation checks were clean, and no broker-related match was identified.

EVIDENCE

- The homepage describes TV guides and editorial entertainment content monetized through advertising, applications, promoted placements and possible subscriptions; no financial transactions or investment services are offered on the reviewed page.
- The site is served through AS16625, AKAMAI-AS — Akamai Technologies, Inc., United States.
- The transport certificate is issued by GeoTrust TLS ECC CA G1 with OV validation for Prisma Media SAS and is valid through 2027-01-13 23:59:59 UTC.
- The observed global traffic ranking is 1444, placing the site within the top one million domains.

What to Verify Next

Before credential or payment interactions, independently confirm the operating publisher or merchant entity, review the applicable terms, privacy and return or cancellation provisions, and ensure that any payment method provides appropriate protection. Official social or publisher channels should be cross-checked through an independent route before relying on account-support or subscription communications. If a paid service is introduced, the relevant corporate and regulatory information should be checked against the appropriate public registry.

EVIDENCE

- The homepage offers account-related prompts such as “Me connecter” and “Mon espace,” but no sensitive login form was present in the reviewed capture.
- The content model identifies possible subscriptions, application downloads and account features, creating a limited need for ordinary merchant and payment checks if those functions are used.
- Social links on the homepage point to Facebook, X and Instagram profiles using the Télé-Loisirs name.

Summary Verdict

The overall posture is **high trust and low risk** for the site's apparent informational purpose. The convergence of sustained historical presence, broad audience reach, clean reputation signals and coherent editorial content supports an established, apparently legitimate assessment, while operator identity remains only likely rather than independently verified.

Infrastructure Integrity

Protective delivery infrastructure is present: AWS CDN/WAF protection was identified, and all three observed IP addresses were CDN edge servers rather than identified origin candidates. This reduces direct exposure of the origin environment and is a mitigating infrastructure signal, but it is not proof of the site operator's legitimacy.

EVIDENCE

- AWS CDN/WAF protection was identified in the hosting configuration.
- Three observed IP addresses were classified as CDN edge servers; no origin candidate was identified.
- The infrastructure facts identify Amazon.com, Inc. as the CDN/hosting provider, with AS16509 as the principal observed hosting ASN.

Closing Assessment

Ordinary browsing and standard site use are proportionate to the assessed posture; before submitting credentials or making payments, independent merchant-identity, policy and payment-protection checks should be completed.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of programme-tv.net.

- The request stayed on programme-tv.net. It was not redirected to another domain. CLEAR
- Registration is published under Namebay. CLEAR
- DNS for this domain is served by vp-dns.net, across 3 name servers. NOTED
- The registration is paid up to 2026-10-06. NOTED

- The earliest public archive of this site is from 2002-11-21. CLEAR
- It is hosted on AKAMAI-AS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about programme-tv.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
