

Is project442.com a scam? TrustSniffer's high-risk assessment: 0/100

project442.com

Verdict

0

OUT OF 100

CRITICAL RISK

project442.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A Hostinger-provided parked domain landing page offering links to hosting, website builder, VPS, domain search and business email. No sign-in, no transactions on-page.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	14 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	33% confidence AbuseIPDB, 28 reports; shared hosting inflates reports	CLEAR
Domain age	4 months old Most scam domains are under a year old	RISK
Web archive	Archived since 2009 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YE1	NOTED

The page as captured

https://project442.com/

Registered at  **HOSTINGER**

If this is your domain, you can manage it in your Hostinger account.

What project442.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2009.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

project442.com is a parked-domain landing page presented through Hostinger's DNS system. It directs visitors to Hostinger services including web hosting, an AI website builder, VPS hosting, domain search, and business email, indicating a placeholder or referral-based purpose rather than an operating service platform.

Scam/Impersonation Risk

The site has a **critical sensitive-interaction risk posture** because the domain is confirmed as blacklisted and received multiple malicious detections from external security providers, including Kaspersky and Sophos. These signals are materially more significant than the benign appearance of the parked page and indicate that the domain should not be treated as suitable for login, credential submission, financial activity, or other sensitive interaction. No brand impersonation, conflicting legal identities, or phishing form was observed in the supplied page content; however, the absence of an active phishing interface does not offset the confirmed external detections. Separate abuse reports relate to the shared hosting IP used by Hostinger International Limited, so they are infrastructure-level context rather than proof that the parked page itself generated the reported activity.

EVIDENCE

- The homepage is labelled “Parked Domain name on Hostinger DNS system” and contains no sign-in form, sensitive form, or on-page transaction mechanism.
- External security evaluation recorded 14 malicious detections from 19 effective detections, with Kaspersky and Sophos among the tier-one flagging providers; the domain was also marked by external blacklist sources.
- WHOIS records show registration on 2026-04-22 and an age of 0.33 years.

Regulatory Verification Notes

The supplied site content does not provide a substantive corporate, legal, or licensing presentation; it is a parked landing page rather than a regulated-service website. Operator identity remains unverified and ownership opacity is present, so Hostinger’s branding on the page should not be interpreted as proof that Hostinger operates or endorses the domain. No broker-dataset match was identified, but that absence is contextual only and is not a licensing or regulatory determination. The available transport and hosting indicators are technically valid but provide limited assurance about the real-world operator.

EVIDENCE

- WHOIS identifies the registrar as HOSTINGER operations, UAB.
- Hosting telemetry identifies AS47583, AS-HOSTINGER - Hostinger International Limited, CY.
- The site uses a valid DV TLS certificate issued by YE1, valid to 2026-10-12T08:13:05+00:00.

What to Verify Next

Any prospective business use should first establish the real-world operator through an independent corporate registry and confirm whether the intended activity requires licensing with the relevant regulator. Payment, account, or credential activity should remain suspended until the domain’s status is clarified through an independently sourced contact channel rather than links presented by the parked page.

EVIDENCE

- The supplied content contains no named operating entity, license authority, or license number to support regulated-service validation.
- The page is classified as a parked or hosting-placeholder landing page, with no operating service workflow available for direct business verification.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The available evidence does not establish a verified operator identity, and the confirmed external threat detections and blacklist status outweigh the page’s otherwise limited, non-transactional presentation.

Infrastructure Integrity

CDN/WAF protection provides a mitigating layer against direct exposure but is not evidence of legitimacy. The infrastructure includes two observed CDN edge addresses on AS16509 and five potential origin candidates; this protective architecture should therefore be regarded as a technical control only, not as operator validation.

Closing Assessment

Sensitive use should be withheld unless independent operator, regulatory, and domain-status checks produce clear, corroborated results.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 28 reports on hosting IP 2.57.91.91 (Hostinger International Limited, Content Delivery Network), 33% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of project442.com.

- The request stayed on project442.com. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED

- The registration is paid up to 2027-04-22. NOTED
- The earliest public archive of this site is from 2009-03-24. CLEAR
- It is hosted on AS-HOSTINGER, from a server in CY. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about project442.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
