Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

promueveinmobiliaria.com currently presents an auto-generated root directory rather than a developed business website: the homepage displays "Index of /," lists a `cgi-bin` directory, and shows a LiteSpeed server signature, with no visible commercial, registration, or financial-service functionality.

Scam/Impersonation Risk

The site has a **materially elevated scam and impersonation risk** because external security intelligence has classified the domain as blacklisted, with multiple malicious and suspicious detections. This reputation signal outweighs the otherwise limited page-level observations: the captured homepage contains no login form, payment flow, interactive financial feature, or visible brand impersonation, and no identity contradiction between legal entities was established. The available evidence therefore does not prove that the directory page itself is actively conducting phishing or impersonation, but it does provide sufficient grounds to treat sensitive interaction as unsafe.

EVIDENCE

- External reputation checks recorded 16 malicious and 2 suspicious detections, with Fortinet, Kaspersky, and Sophos among the flagged services.
- The domain is recorded as blacklisted by two external sources; a separate Google Safe Browsing result was negative.
- Historical records report 180 archive snapshots across 8 years tracked, from 2018 through 2026; the historical assessment found no suspicious repurposing or semantic drift.
- Domain registration telemetry records creation on 2026-01-24, approximately 0.57 years before assessment.

Regulatory Verification Notes

The captured homepage provides no identifiable legal-entity description, licensing claim, registration number, or regulated-service disclosure. Because the page is only a directory index, this is a **transparency and verification gap**, not standalone evidence of a scam; however, the real-world operator remains unverified and the site cannot be treated as an independently established regulated entity. The available broker-reputation context contains no matching record, but that absence is not a licensing or legitimacy determination.

EVIDENCE

- The homepage title is "Index of /" and contains only a directory listing and server signature, with no company or regulatory disclosure.
- The site's transport encryption uses a DV certificate issued by YR2, valid through 2026-10-24.
- The domain registrar is GoDaddy.com, LLC; the registration record identifies Registration Private and Domains By Proxy, LLC.

What to Verify Next

Before any sensitive interaction, an independent registry search should confirm whether a legally identifiable operator exists and whether any claimed activity requires authorization. Any proposed account, payment, download, or other consequential action should remain suspended until the official support and contact channels are confirmed through an independently obtained route rather than information supplied solely by the site.

EVIDENCE

- The homepage exposes no forms, signup process, payment mechanism, or external links that could establish an operating business.
- The captured page contains only 148 characters of rendered text and no legal, corporate, or licensing content.
- The site's hosting infrastructure resolves to AS211611, operated by eximhost - Exim Host SRL, RO.

Summary Verdict

The overall posture is **critical trust risk**, with the domain unsuitable for sensitive interaction. The evidence supports passive observation only and does not support treating the site as a verified or dependable service.

Infrastructure Integrity

The site is served from eximhost - Exim Host SRL in Romania on AS211611, with one resolved IP and no CDN or edge-IP layer detected; the observed address is therefore likely the hosting origin. This infrastructure provides no meaningful protective mitigation against the adverse external reputation assessment.

Closing Assessment

Enterprise controls should block or isolate sensitive access to the domain, while any business need for further examination should be handled through controlled, read-only analysis and independent operator verification.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

About this assessment

A trust score summarises the evidence TrustSniffer could collect about promueveinmobiliaria.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
