

Is proncad.com a scam? TrustSniffer's high-risk assessment: 0/100

proncad.com

Verdict

0

OUT OF 100

CRITICAL RISK

proncad.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Marketing/landing page for PRONCAD I.Technologies offering PMI PMP exam preparation courses with schedules, pricing in local currency, purchase buttons, and student testimonials.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://proncad.com/>

What proncad.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This is a course-sales website presenting PRONCAD I.TECHNOLOGIES as a provider of instructor-led Project Management Professional (PMP) examination-preparation courses, with scheduled batches, enrolment options, pricing, testimonials, and claims concerning PMI-related certification training.

Scam/Impersonation Risk

The site's visible content is a conventional education landing page and does not itself show credential-harvesting forms, wallet functionality, cloaking, or clear brand-impersonation indicators. However, this benign presentation is materially outweighed by confirmed external threat detections and blacklist status, including detections from Fortinet and Sophos. The homepage also promotes strong marketing claims such as "100% pass success rate," "highly qualified, certified, and accredited trainers," and PMI accreditation; these claims should not be treated as independently established. No conflicting legal-entity names or direct brand-impersonation indicators were observed in the supplied page findings, but the external reputation contradiction is sufficient to make login, credential submission, and financial interaction inappropriate pending resolution.

EVIDENCE

- External reputation assessment recorded 13 malicious detections and 2 suspicious detections among 20 evaluated results; Fortinet and Sophos were specifically identified as flagged providers.
- The site is recorded as externally blacklisted, with the associated protective kill-switch condition active.
- The homepage presents PMP training, paid enrolment, student testimonials, and a claimed “100% pass success rate,” but the page-level review recorded no explicit fraud indicators.
- Historical site coverage is recorded from 2021-12-17 through 2025-07-18 across 5 tracked years, with no suspicious repurposing identified.

Regulatory Verification Notes

The available site material identifies the operator presentation as PRONCAD I.TECHNOLOGIES and describes an education and training business rather than a clearly regulated financial service. No license or registration number is claimed in the supplied business-model evidence, and the site's independently verified connection to a real-world operator remains unverified. This is a disclosure and verification gap, not by itself evidence of a scam; nevertheless, the claimed relationship to PMI and the identity of the contracting entity should be established independently before any paid enrolment. The separate broker-reputation dataset contained no matching record, which is only a limited contextual signal and does not validate the business.

EVIDENCE

- Domain registered through NAMECHEAP INC on 2021-10-26 and recorded as approximately 4.82 years old.
- The homepage identifies “PRONCAD I.TECHNOLOGIES” and provides About, FAQ, Contact, and Login/Enroll navigation.
- The site's transport encryption uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid through 2026-11-07.
- No license authority or license number was supplied in the business-model evidence.

What to Verify Next

Before any sensitive interaction, the claimed PMI relationship should be confirmed through PMI's independent official channels, and the legal entity receiving payment should be matched to independently obtained corporate and payment records. Course terms, refund conditions, instructor credentials, and the beneficiary of any payment should be confirmed using contact details obtained through an independent route rather than relying solely on the website. The external blacklist and malicious-detection findings should also be resolved by the site operator and rechecked before the domain is reconsidered for account or payment use.

EVIDENCE

- The homepage provides purchase and enrolment calls to action alongside email capture, but the captured form was not classified as a sensitive credential form.
- Behavioral testing recorded no external form posts, no hidden forms, no password submissions to external destinations, and no wallet-connect activity.
- The page returned successfully in both recorded behavioral runs, while also producing 4 console errors and a maximum post-interaction DOM difference of 1,435 elements.

Summary Verdict

The website has a **critical trust posture** driven by convergent external threat and blacklist findings, despite presenting a superficially standard course-business model. Its real-world operator identity is not independently verified, and the available evidence does not support treating the domain as suitable for sensitive account or payment activity.

Infrastructure Integrity

The site resolves directly to infrastructure hosted by Namecheap, Inc. in the United States, without a detected CDN or WAF edge layer; a single resolved address is assessed as a likely origin. The hosting arrangement and valid TLS provide basic transport and operational context, but they do not establish legitimacy or offset the external reputation risk.

EVIDENCE

- Served from AS22612, identified as NAMECHEAP-NET — Namecheap, Inc., US.
- Resolved infrastructure contains 1 unique IP, with 0 detected edge IPs and 1 likely origin candidate.

Closing Assessment

A prospective user should refrain from login, credential submission, and financial transactions on the site unless the external detections are cleared and the operator, claims, and payment arrangements are independently validated.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of proncad.com.

- The request stayed on proncad.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by namecheaphosting.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-26. NOTED
- The earliest public archive of this site is from 2021-12-17. CLEAR
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about proncad.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
