

Is pronews.gr legit? TrustSniffer's high-trust assessment: 90/100

pronews.gr

Verdict

90

OUT OF 100

HIGH TRUST

pronews.gr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Greek news portal (Pronews.gr) publishing a wide range of topical articles and monetizing via advertising, sponsored/affiliate listings and social distribution. Contains cookie consent and multiple third-party links and trackers.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Pronews.gr is a Greek online news portal presenting editorial coverage across national and international news, politics, economics, sport, health, lifestyle, defence and security. Its apparent business model is ad-supported publishing supplemented by sponsored or affiliate listings, third-party partnerships and social-media distribution.

Scam/Impersonation Risk

No contradictions were observed: the available evidence identifies no phishing, impersonation, malicious-content or confirmed blacklist signal. The site presents substantial, continuously maintained editorial content rather than a credential-harvesting or transactional abuse pattern, and its homepage contains only a cookie-consent form with no login or sensitive-data form. Three abuse reports were associated with shared CDN infrastructure rather than the website specifically; the reports were whitelisted, assigned zero confidence and discounted on that basis. Overall, the site is consistent with an established, apparently legitimate publisher, although the real-world operator identity is not independently verified.

EVIDENCE

- The homepage is classified as a news/media page with editorial coverage across eight stated subject areas, no detected red flags, no login form and no sensitive form beyond cookie consent.
- Domain registration continuity is recorded at 9.19 years (3358 days); archival records first show the site on 2017-06-03T06:02:32Z.
- The web archive contains 3276 snapshots across 10 years, from 2017-06-03T06:02:32Z through 2026-08-11T15:37:17Z, with a maximum gap of 1 year.
- The site has a traffic rank of 21150 and is within the top 1,000,000 sites; the three reported incidents concern shared Cloudflare infrastructure and carry a confidence score of 0.

Regulatory Verification Notes

The available material is consistent with a mature news publisher, not a site presenting itself as a regulated financial service. No license claim or license number is presented in the supplied site evidence, so regulatory licensing is not applicable on the face of the stated publishing model but should not be inferred for any particular sponsored or affiliate offering. The homepage provides links to contact and privacy information and displays a detailed consent notice covering advertising and data-processing partners. This supports ordinary publishing transparency, while the operator's legal identity remains not independently verified. No broker match was

identified in the available third-party reputational context; that is contextual only and is not a licensing determination.

EVIDENCE

- The homepage describes Pronews.gr as a news and media publication and identifies advertising, sponsored/affiliate content and third-party partnerships as its apparent revenue channels.
- The homepage's consent notice states that cookies and partner processing support personalised advertising, content measurement, audience research and service development.
- The site's transport encryption uses a DV TLS certificate issued by WE1, valid to 2026-10-01T10:43:45+00:00.
- Hosting telemetry identifies AS13335, CLOUDFLARENET—Cloudflare, Inc., US.

What to Verify Next

Before credential or payment interactions associated with any sponsored or affiliate offer, independently confirm the responsible merchant or service provider, applicable return or refund terms, and available payment-protection mechanisms. Where an offering could constitute a regulated service, confirm the provider and licence directly with the relevant competent registry rather than relying on the publication's listing. Contact details should be validated through an independently sourced official channel before resolving disputes or sending sensitive information.

EVIDENCE

- The homepage links to the contact page and privacy page, providing designated locations for channel and data-use review.
- The homepage contains one cookie-consent form and no detected password or payment form.
- The site links to YouTube, Twitch, X and Telegram, providing channels that can be compared against independently sourced official profiles.

Summary Verdict

Pronews.gr has a high-trust, low-risk posture and is consistent with an established, apparently legitimate website. The evidence supports normal browsing and routine site interaction, while the operator connection remains probable rather than independently proven.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure. All observed addresses are CDN edge servers, with six edge addresses identified and no origin candidates observed; this reduces direct exposure of the hosting origin and is a mitigating infrastructure control, not proof of legitimacy.

Closing Assessment

Ordinary browsing is proportionate, while any credential or payment interaction should follow independent merchant-identity, terms-and-payment-protection checks before proceeding.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 3 reports on hosting IP 2606:4700:20::ac43:4558 (Cloudflare, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pronews.gr.

- The request stayed on pronews.gr. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2017-06-03. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pronews.gr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
