Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Proshoper is a Russian informational shopping portal presenting retail promotions, store catalogs, coupons, shopping guidance, and user comments, with the apparent business model of aggregating discounts and retailer information rather than providing financial or investment services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent retail-information service with named supermarket, electronics, pharmacy, and household retailers, while the supplied page analysis found no phishing indicators, brand impersonation, sensitive forms, or high-risk financial behavior. The site's published functionality is consistent with its stated informational purpose.

- The homepage describes promotions, catalogs, coupons, retailer listings, city selection, and user comments.
- The homepage analysis found no sensitive form, hidden form, untrusted destination, or suspected brand impersonation.
- External reputation checks recorded no malicious or suspicious detections.

Regulatory Verification Notes

The analyzed material supports an established informational retail model rather than a regulated financial service. No financial license claim or registration number is presented in the supplied site content; this is a transparency point for any commercial relationship, not evidence of deception. The domain, historical continuity, transport security, and clean external reputation provide affirmative support for the site's established identity.

- Registered 2014-02-25 (~12.44 years old), through REGRU-RU; expiry is 2027-02-25.
- 567 archive snapshots spanning 2014–2026, with 13 years tracked.
- Hosted on AS50340 (SELECTEL-MSK - JSC Selectel, RU).
- TLS certificate issued by YE2 (DV), valid to 2026-09-05.

What to Verify Next

For ordinary use, confirm that promotion dates, locations, and retailer terms remain current before relying on a specific offer. Any commercial partnership or regulated activity should be checked against the relevant retailer or official registry independently.

- The homepage displays city selection and dated promotional content.
- The homepage provides retailer categories and store-specific catalog information.
- The homepage references mobile applications and web-app installation guidance.

Summary Verdict

The site presents as a legitimate, established, and low-risk informational service. Its identity, content purpose, historical continuity, and external reputation converge without contradictory signals, supporting normal interaction and standard account use.

Infrastructure Integrity

The site has no detected CDN or WAF and resolves to one apparent origin address. This provides less edge-layer shielding than a CDN-backed deployment, but it is a neutral infrastructure characteristic and does not undermine the established trust posture.

Closing Assessment

Normal browsing, account access, and standard use are appropriate, with routine attention to the currency and terms of individual offers.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

About this assessment

A trust score summarises the evidence TrustSniffer could collect about proshoper.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
