Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is Prospect Magazine, a digital current-affairs publication presenting articles on politics, culture, policy, people, ideas, and the arts, with an apparent business model based on subscriptions, advertising, events, and related paid content.

Scam/Impersonation Risk

No phishing, impersonation, or conflicting-identity contradiction was observed. The homepage presents a coherent editorial publication rather than a deceptive financial, investment, or credential-harvesting service, and the available reputation checks found no malicious or suspicious classification. The real-world operator remains independently unverified, so the legitimacy assessment is evidence-consistent rather than proof of identity.

EVIDENCE

- The homepage identifies the publication as “Prospect Magazine” and displays consistent magazine navigation across politics, culture, ideas, podcasts, and events.
- The domain was registered on 2004-04-06 and is recorded as approximately 22.36 years old.

Regulatory Verification Notes

The site presents itself as a news and policy publisher, not as a financial service or other business whose ordinary operation inherently requires a financial-services license. Its commercial activities include subscriptions, sponsored or advertising content, events, policy reports, and memberships; paid interactions should therefore be assessed through ordinary publisher and merchant-transparency checks. The available material does not independently verify the legal entity operating the publication, and no third-party regulatory determination is established. This is a verification limitation, not evidence of a scam.

EVIDENCE

- The page title describes the site as “Prospect Magazine - Britain’s leading monthly current affairs magazine.”
- The registration record identifies Team Blue Internet Services UK Limited t/a Team Blue Internet Services Limited t/a names.co.uk as registrar.
- Transport security uses a valid DV certificate issued by Amazon RSA 2048 M01, valid to 2027-02-04.
- The domain has an established traffic footprint, with a recorded global rank of 40249 and placement within the top one million sites.

What to Verify Next

Before credential or payment interactions, independently confirm the publishing entity associated with the service, review the applicable subscription, cancellation, renewal, refund, and payment-protection terms, and validate official support channels through an independent route. Account activity should remain limited to the intended publication services and should not be used as evidence of the operator’s legal identity.

EVIDENCE

- The homepage provides distinct “Log in” and “Subscribe” pathways, indicating separate account and commercial interaction points.
- The supplied page capture contains no visible sensitive credential or payment-collection form.
- The site’s stated commercial model includes paid publication-related services, making merchant terms and payment protections the relevant checks.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a low-risk trust posture and no observed scam or impersonation contradictions. The classification is strong, but the real-world operator identity is not independently verified.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, with observed edge addresses hosted on AS16509 by Amazon.com, Inc. in the United States; the origin server was not observable in this analysis. This infrastructure provides a meaningful exposure-mitigation signal, but it is not proof of operator legitimacy.

Closing Assessment

Ordinary use is proportionate to the assessment, subject to the independent merchant-identity, service-term, and payment-protection checks appropriate for any paid online publication.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of prospectmagazine.co.uk.

- The request stayed on prospectmagazine.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under Team Blue Internet Services UK Limited t/a Team Blue Internet Services Limited t/a names.co.uk. CLEAR
- DNS for this domain is served by net., across 3 name servers. NOTED
- The registration is paid up to 2027-04-06. NOTED
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about prospectmagazine.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were

consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
