

Is proteantech.in legit? TrustSniffer's high-trust assessment: 100/100

proteantech.in

Verdict

100

OUT OF 100

HIGH TRUST

proteantech.in appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 70%.

What this site appears to be

Corporate website for Protean eGov Technologies (formerly NSDL e-Gov) describing digital public infrastructure products and government/enterprise services such as PAN, NPS, eKYC, identity solutions, cloud and infosec offerings, company legacy and awards.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the corporate website of Protean eGov Technologies, presenting digital public-infrastructure and technology services for government and enterprise customers. Its apparent business model is based on institutional contracts, professional services, and platform integrations rather than consumer retail or speculative financial activity.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, blacklist, or malicious-content indicators. The homepage presents a coherent corporate/public-sector profile, and its subject matter is consistent with the stated Protean eGov Technologies identity. A limited behavioral anomaly involved external network requests, but no cloaking, hidden forms, password submissions, wallet activity, clipboard manipulation, or other abuse-ready behavior was recorded; it therefore does not materially alter the low-risk assessment. The site also has a strong global traffic footprint and clean external reputation signals.

EVIDENCE

- Homepage: describes Protean eGov Technologies and digital public infrastructure, with no detected scam or impersonation indicators.
- Homepage behavior: 0 hidden forms, 0 external password forms, 0 wallet-connect runs, 0 wallet-drainer runs, and no cloaking detected.
- Domain registration: Registered 2021 (~4.81 years old).
- Web archive: 83 snapshots spanning 2023–2026 (4 years tracked).

Regulatory Verification Notes

The site presents Protean eGov Technologies, formerly NSDL e-Gov, as an established provider of PAN, NPS/APY, eKYC and Aadhaar authentication, digital identity and verifiable-credential solutions, cloud and information-security services, and enterprise DPI, ONDC, and CKYC capabilities. The supplied content does not state a license or registration number; this is a regulatory-disclosure gap requiring contextual verification, not evidence of misconduct. The real-world operator identity remains independently unverified, so the on-site corporate presentation should be treated as evidence-consistent rather than conclusive. No matching third-party broker warning was identified.

EVIDENCE

- Corporate and company-history pages: identify Protean eGov Technologies and describe its legacy, awards, and public-sector technology services.
- Registration record: lists Protean eGov Technologies Limited and registrar Endurance International Group India Private Limited.
- Hosting telemetry: Served from AS396982 (GOOGLE-CLOUD-PLATFORM - Google LLC, US).
- Transport encryption: TLS certificate issued by WR3 (DV), valid to 2026-11-08.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm that Protean eGov Technologies Limited is the responsible entity through an official corporate or government registry and confirm the domain through an independently obtained corporate contact route. Where a service relates to PAN, NPS, Aadhaar, CKYC, or other public programs, the relevant government or program authority should independently confirm the service relationship and applicable authorization. Standard terms, privacy provisions, service responsibilities, and payment-protection arrangements should also be reviewed for the specific transaction.

EVIDENCE

- Corporate pages: provide the legal-name and business-purpose information to reconcile against an independent registry.
- Service pages: identify the public-sector programs and enterprise services requiring authority or contractual confirmation.
- Site forms: 0 forms were detected on the analyzed homepage, so any later credential or payment workflow should be assessed separately.

Summary Verdict

The overall posture is **high trust and low risk**, with strong convergence between the site's coherent corporate purpose, established public presence, clean reputation, and consistent technical presentation. It is apparently legitimate and evidence-consistent with an established enterprise technology website, while independent confirmation of the real-world operator remains incomplete.

Infrastructure Integrity

The site resolves through Google Cloud infrastructure with one identified IP and no dedicated CDN edge layer or separately detected CDN/WAF vendor. Google Cloud hosting is a mitigating infrastructure signal, but it is not, by itself, proof of corporate legitimacy.

Closing Assessment

Ordinary use is proportionate to the assessed posture, provided that independent entity, service-authority, terms, and payment-protection checks are completed before sensitive or financially consequential interactions.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of proteantech.in.

- The request stayed on proteantech.in. It was not redirected to another domain. CLEAR
- Registration is published under Endurance International Group India Private Limited. CLEAR
- DNS for this domain is served by awsdns-14.net, across 4 name servers. NOTED
- The registration is paid up to 2026-10-25. NOTED
- The earliest public archive of this site is from 2023-01-24. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about proteantech.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
