

Is proximatesolutions.com a scam? TrustSniffer's high-risk assessment: 0/100

proximatesolutions.com

Verdict

0

OUT OF 100

CRITICAL RISK

proximatesolutions.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

Proximate Solutions is a digital marketing and AI automation agency (since 2004) offering web development, e-commerce, SEO, and AI-driven services; site contains service pages, portfolio, and contact/consultation form.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Smart design to

What proximatesolutions.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2005.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is the public-facing site of “Proximate Solutions,” presenting itself as a B2B digital marketing and AI automation agency. It offers web and app development, Shopify and e-commerce work, SEO, performance marketing, generative-AI solutions, chatbots, staff augmentation, content creation, and related managed services, with an apparent business model based on project fees, retainers, and client consultations.

Scam/Impersonation Risk

No identity impersonation, phishing form, or conflicting legal identity was identified in the supplied page evidence; however, material external contradictions are present. Independent reputation checks recorded malicious detections and a confirmed blacklist hit, including a Tier-1 security-vendor detection. These signals outweigh the otherwise professional agency presentation and the absence of obvious credential-harvesting features. Homepage interaction testing also identified suspicious inline scripting and substantial document changes after interaction, which increase uncertainty around dynamic page behavior. The domain and archival

record indicate long-running continuity, but that historical strength does not neutralize the current external threat detections.

EVIDENCE

- External reputation checks recorded 3 malicious detections, 1 suspicious detection, and a confirmed blacklist hit.
- Homepage behavior across 2 successful runs identified 2 suspicious inline scripts and a maximum post-interaction DOM difference of 2239.
- Domain registration: 2005-03-29; age 21.41 years. Web archive: 305 snapshots spanning 2005–2026, covering 22 years.
- The homepage contains no login form, hidden form, password-external form, wallet connection, or wallet-drainer behavior; it contains 1 contact/consultation form.

Regulatory Verification Notes

The site's apparent business model is commercial digital-services contracting rather than a clearly regulated financial activity. Nevertheless, the available material does not independently verify the operating legal entity, and no licensing authority or license number is presented in the supplied site evidence. This is a verification gap rather than, by itself, proof of fraud. The domain is registered through GoDaddy.com, LLC, while the technical certificate and hosting arrangements provide infrastructure facts but do not establish the operator's identity. The available evidence is therefore insufficient to treat the business identity or contracting counterparty as verified.

EVIDENCE

- The site navigation provides About Us, Careers, Contact Us, Portfolio, Case Studies, and Request Consultation pages, but the supplied content does not establish a legal entity name, licensing authority, or license number.
- Registered through GoDaddy.com, LLC.
- Served from AS196752 (TILAA - Tilaa B.V., NL).
- TLS certificate issued by YR2, DV validation, valid to 2026-10-31T07:22:42+00:00.

What to Verify Next

Before any commercial engagement, the proposed contracting entity should be confirmed through an applicable corporate registry and the contractual counterparty should match the entity named on invoices, statements of work, and payment instructions. Any sector-specific authorization requirement should be checked with the relevant regulator rather than inferred from the site's service descriptions. Contact details and payment instructions should be validated through an independently sourced business channel, and work should begin only under a written agreement with clear deliverables, refund or termination terms, data-processing responsibilities, and dispute jurisdiction.

EVIDENCE

- The site provides service, portfolio, case-study, and consultation pathways that can be compared against the proposed contracting entity and scope of work.
- The supplied page analysis classifies the site as a service/agency website and records no immediate credential-harvesting indicators.
- The supplied regulatory evidence does not identify a licensing authority or license number for independent confirmation.

Summary Verdict

The overall posture is **critical trust risk**. Although the site presents a coherent, established-looking agency proposition with substantial historical continuity, confirmed external threat detections and blacklist signals create a decisive barrier to treating it as trustworthy for sensitive interaction. The real-world operator also remains unverified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and the observed address was a CDN edge address rather than an independently visible origin. This provides a mitigating layer against direct exposure, but protective delivery infrastructure is not evidence that the underlying site or operator is legitimate.

Closing Assessment

The appropriate posture is passive review only; login, credential submission, and financial interaction should not proceed unless the external reputation issue and the contracting entity have been independently resolved.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of proximatesolutions.com.

- The request stayed on proximatesolutions.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2033-03-29. CLEAR
- The earliest public archive of this site is from 2005-11-30. CLEAR
- It is hosted on TILAA, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about proximatesolutions.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
