Full analysis

Overview

This website is the official Premier Soccer League portal, presenting team and club listings, tournament information, fixtures, standings, live results, match-centre content, news, videos, and sponsor information for visitors seeking current South African football coverage.

Scam/Impersonation Risk

No contradictions were observed. The site's sports-league content is coherent with its stated purpose, and the analyzed homepage contains no financial solicitation, deposit mechanism, credential-collection form, wallet connection, phishing indicator, or brand-impersonation signal. External reputation checks found no malicious or suspicious detections, no blacklist hit, and no reported abuse associated with the observed hosting address. The historical record also supports continuity rather than suspicious repurposing, while the independently verified real-world operator identity remains unconfirmed.

EVIDENCE

- Homepage: identifies itself as the Premier Soccer League website and provides current clubs, competitions, fixtures, results, news, videos, and sponsor content.
- Homepage forms analysis: 0 forms detected, with no sensitive form, hidden form, password submission, wallet activity, or untrusted destination observed.
- Domain registration: registered 1997-08-25 (~28.98 years old).
- Web archive: 5,000 snapshots spanning 2001-11-27 to 2025-11-18, covering 25 years.

Regulatory Verification Notes

The available content supports an established sports-media and league-portal business model rather than a financial service requiring investment licensing. No license claim or license number is presented in the analyzed site content; this is a transparency point for ordinary organizational verification, not evidence of a scam. The site's apparent Premier Soccer League identity is consistent across its content, but the real-world operator connection has not been independently verified. A separate broker-reputation dataset produced no match, which is contextual reassurance only and not a legal or regulatory determination.

EVIDENCE

- Homepage and About navigation: present the site as a Premier Soccer League information portal, with no investment, deposit, or regulated-financial-service offering identified.
- Hosting infrastructure: served from AS8075, Microsoft Corporation, US.
- Transport encryption: TLS certificate issued by Go Daddy Secure Certificate Authority - G2, domain validation (DV), valid to 2026-08-18.
- Registration record: registrar Lexsynergy Limited; registrant organization recorded as PSL; expiration date 2027-08-25.

What to Verify Next

Before any credential or payment interaction connected with the site, independently confirm the league's organizational identity through an official, offline or separately sourced channel. If a page redirects to ticketing, sponsorship, merchandise, or other payment services, review the destination's merchant identity, return terms, and available payment protections separately from this site. Any regulatory or corporate disclosure relied upon for procurement or partnership decisions should be confirmed against the relevant official registry.

EVIDENCE

- Homepage: provides sponsor and competition information but does not present a user deposit or investment workflow.
- Site navigation: includes About, Clubs, Tournaments, Match Centre, Results, Fixtures, Table, Live, and Videos sections for independent cross-checking of the stated purpose.
- Payment-related assessment: no sensitive form or credential-collection mechanism was detected on the analyzed pages.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated sports-information purpose. No scam, phishing, impersonation, or other contradicting signal was identified, although the operator's real-world identity is not independently verified.

Infrastructure Integrity

The site is protected by a CDN/WAF arrangement, with observed addressing comprising a CDN edge server and a potential origin candidate. This provides a useful mitigating layer against direct exposure and common availability threats, but protective infrastructure alone is not proof of organizational legitimacy.

Closing Assessment

Ordinary browsing and standard site use are proportionate to the assessed posture; credential or payment interactions should remain conditional on independent confirmation of the relevant organization, merchant, and payment-protection details.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about psl.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
