

Is psspfund.co.za legit? TrustSniffer's high-trust assessment: 90/100

psspfund.co.za

Verdict

90
OUT OF 100

HIGH TRUST

psspfund.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 70%.

What this site appears to be

Official-style homepage for South Africa's Private Security Sector Provident Fund, presenting fund governance, contribution notices, benefits, financial documents, employer and member resources, portals, news, vacancies, and contact facilities. The page identifies a physical legal address and organizational email and makes no guaranteed-return or high-pressure investment claims.

Evidence status and limitations

Evidence completeness:

UNKNOWN

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents the official-style online presence of South Africa's Private Security Sector Provident Fund, a contribution-funded retirement scheme serving the private-security industry and administering retirement savings together with withdrawal, disability, death, and funeral benefits.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, or deceptive financial-return claims were observed. The long-established domain is registered to the Private Security Sector Provident Fund, while the site's sustained archival presence and consistent institutional subject matter support provenance. The homepage's contact and subscription forms have no untrusted destination, and behavioral testing found no hidden forms, credential forwarding, cloaking, clipboard interference, or suspicious scripts.

- The domain registration record identifies the organization as "Private Security Sector Provident Fund"; registered 2010-06-18 (~16.13 years old), with registration valid to 2027-06-18 through DIAMATRIX C.C.
- The domain's archive record contains 91 snapshots spanning 2013-01-28 to 2026-04-21 (14 years tracked), with no suspicious repurposing or semantic drift established.
- The homepage contains no detected brand-impersonation indicators, guaranteed-return representations, high-pressure investment language, or page-level fraud flags.
- The homepage's two forms are classified as contact-enquiry and email-subscription facilities; neither uses an untrusted destination, and no login form is embedded on that page.

Regulatory Verification Notes

The site provides substantial institutional material, including fund rules, trustee and management information, financial statements, investment returns, contribution rates, legal notices, and resources for members and employers. It also presents the fund as a legislated provident fund, but the supplied pages do not establish a specific regulator, registration number, or licence reference; this is a minor disclosure-verification point rather than evidence of illegitimacy. The named registrant, legal-address presentation, and governance-oriented content form a coherent organizational identity.

- The homepage navigation provides dedicated pages for the Board of Trustees, fund-management structure, fund rules, financial statements, legal notices, and industry and stakeholder links.
- The homepage identifies a physical legal address and organizational contact facilities alongside member, employer, complaints, and administrator resources.

- The site's transport encryption uses a YR2-issued domain-validated TLS certificate, valid to 2026-10-14.
- The hosting infrastructure is served from AS37153 (Xneelo (Pty) Ltd, South Africa).

What to Verify Next

For regulated onboarding or material reliance, the fund's legal status and governing rules should be matched against the relevant South African official registry, using the registered entity name and physical address shown by the site. Portal destinations should be confirmed from the homepage before account activity, while current contribution instructions and benefit terms should be reconciled with the latest downloadable fund documents. Official contact channels may also be independently confirmed for high-impact member or employer requests.

- The homepage offers separate Member Portal and Employer Portal entry points rather than presenting an embedded credential form.
- The fund section provides downloadable rules, financial statements, investment-return material, contribution rates, and benefit documentation for documentary comparison.
- The homepage carries a dated notice concerning a temporary contribution reduction and proposed rule amendment, demonstrating that contribution terms may be subject to formal updates.
- The contact area separates administrator details, liaison functions, general contact information, and compliments-and-complaints facilities.

Summary Verdict

The website is a legitimate, established, and trustworthy institutional presence. Its coherent identity, mature provenance, substantive governance content, clean external reputation, and benign observed behavior support normal interaction, including account login and standard use.

Infrastructure Integrity

The site resolves directly to a single likely origin address in South Africa and does not use a detected CDN or WAF. Xneelo provides the hosting environment; the resolved infrastructure is internally assessed as consistent and presents no confirmed abuse pattern, although direct origin exposure offers less network-layer shielding than a managed edge service.

Closing Assessment

Prospective members, employers, and institutional counterparties may use the site normally, applying routine organizational controls for portal access, document validation, and material account instructions.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of psspfund.co.za.

- The request stayed on psspfund.co.za. It was not redirected to another domain. CLEAR
- Registration is published under DIAMATRIX C.C.. CLEAR
- DNS for this domain is served by host-h.net, across 3 name servers. NOTED
- The registration is paid up to 2027-06-18. NOTED
- The earliest public archive of this site is from 2013-01-28. CLEAR
- It is hosted on Xneelo (Pty) Ltd, from a server in ZA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about psspfund.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
