

pub-b98155d31c7b46ecbdf79eab5e37bae3.r2.dev: analysis blocked, no trust verdict

pub-b98155d31c7b46ecbdf79eab5e37bae3.r2.dev

Verdict

n/a

NEEDS REVIEW

The site blocked our scan, so no score was assigned.

pub-b98155d31c7b46ecbdf79eab5e37bae3.r2.dev blocked our automated scan and could not be verified.

The site blocked our scan, so nothing was confirmed either way. Treat it as unknown and verify the business another way.

Needs Review

Assessed 2026-09-23 by automated analysis.

What this site appears to be

A 404/object-not-found page indicating an object is not publicly accessible or does not exist. No forms, links, or monetization elements detected.

Evidence status and limitations

Evidence completeness: **INCOMPLETE**

- Capture was incomplete or blocked; this result requires review.
- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://pub-b98155d31c7b46ecbdf79eab5e37bae3.r2.dev/>

What pub-b98155d31c7b46ecbdf79eab5e37bae3.r2.dev served when TrustSniffer captured it on 2026-09-23. The page may look different now.

Key findings

- The site blocked automated access, so TrustSniffer could not collect enough evidence to assign a score.

Full analysis

Overview

This website currently presents only an object-storage error page stating that the requested object was not found or is not publicly accessible. It does not display a business identity, service offering, transaction flow, or apparent commercial purpose to visitors.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no phishing, impersonation, malicious-page, or confirmed blacklist indicators. The isolated abuse report associated with a shared CDN address is not attributable to this website and was discounted because it concerns shared provider infrastructure. The page itself is an inert error response rather than an active service, and its observed behavior showed no login form, hidden sensitive form, wallet-drainer activity, clipboard hijacking, cloaking, or suspicious inline scripting.

EVIDENCE

- The homepage returned “Error 404 — Object not found” and stated that the object may not exist or may not be publicly accessible; no forms, links, or monetization elements were present.
- Observed page behavior recorded zero wallet-connect runs, zero wallet-sensitive runs, zero wallet-drainer runs, zero hidden forms, and zero password forms submitted to external destinations.
- External reputation results recorded zero malicious and zero suspicious detections; the single abuse report concerned a shared Cloudflare CDN IP and had zero confidence.

Regulatory Verification Notes

The accessible page does not provide a legal entity, licensing statement, registration number, terms, or other business disclosures. This is a transparency gap caused by the page being an object-storage error response, not evidence of an identity contradiction. The real-world operator remains unverified, although the technical and reputational evidence is consistent with an established, apparently legitimate site. No matching third-party broker record was identified. The site also uses valid transport encryption and identifiable mainstream hosting infrastructure, which support technical integrity but do not independently establish the operator’s legal identity.

EVIDENCE

- The homepage title was “Not Found,” with no legal, licensing, corporate, or service disclosures visible.
- Served on AS13335 through Cloudflare, Inc.; the TLS certificate was issued by YE1 at DV validation level and is valid to 2026-12-06.
- No matching third-party broker record was identified.

What to Verify Next

Before any credential or payment interaction with a replacement page or service associated with this domain, independently confirm the operator’s legal identity, applicable licensing or registration, and the legitimacy of the intended service through an official source obtained separately from the page. Standard merchant checks should also confirm applicable return terms and payment-protection arrangements before funds or sensitive information are provided.

EVIDENCE

- The accessible endpoint provides no operator or service identity against which licensing and merchant checks can be performed.
- The page contains no account, payment, or transaction workflow to validate directly.

Summary Verdict

The overall posture is **Needs Review**: available evidence is consistent with an established, apparently legitimate website, but the operator’s real-world identity is not independently verified. No contradictory fraud or impersonation signal was identified, while the absence of an active, identifiable service prevents a fully conclusive legitimacy determination.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure. All observed addresses were CDN edge addresses —104.18.50.34, 104.18.54.45, 2606:4700:311b::6812:3222, and 2606:4700:311b::6812:362d—with no origin-server candidate identified; this reduces direct origin exposure but is only a mitigating technical control, not proof of legitimacy.

Closing Assessment

Proceed only after ordinary independent identity, licensing, merchant-policy, and payment-protection checks have been completed for any associated service or replacement page.

Written analysis generated 2026-09-23 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by capture.

01 Needs Review

- The site blocked automated access by TrustSniffer, or served nothing usable, so the analysis could not be completed.

Capture capture:blocked_or_unavailable

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 2606:4700:311b::6812:3222 (Cloudflare, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pub-b98155d31c7b46ecbdf79eab5e37bae3.r2.dev.

- The request stayed on pub-b98155d31c7b46ecbdf79eab5e37bae3.r2.dev. It was not redirected to another domain. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pub-b98155d31c7b46ecbdf79eab5e37bae3.r2.dev at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
