

Is pub-ce02802067934e0eb072f69bf6427bf6.r2.dev a scam?

TrustSniffer's high-risk assessment: 5/100

pub-ce02802067934e0eb072f69bf6427bf6.r2.dev

Verdict

5

OUT OF 100

CRITICAL RISK

pub-ce02802067934e0eb072f69bf6427bf6.r2.dev shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-22 by automated analysis. Classification confidence 55%.

What this site appears to be

A standard 404 error page indicating the requested object is not found or not publicly accessible. No forms, links, or monetization present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://pub-ce02802067934e0eb072f69bf6427bf6.r2.dev/>

What pub-ce02802067934e0eb072f69bf6427bf6.r2.dev served when TrustSniffer captured it on 2026-09-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This URL presents a static object-storage error page stating “Not Found” and that the requested object either does not exist or is not publicly accessible. It does not present an identifiable business, product, transaction flow, or apparent commercial purpose to visitors.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk** because the endpoint is confirmed as blacklisted and has generated 18 malicious detections and one additional suspicious detection across evaluated security providers, including multiple established security vendors. These signals outweigh the otherwise limited page-level evidence: the captured page is only a 404 response, with no login form, payment mechanism, links, or visible impersonation content. No conflicting legal identities or direct brand-impersonation indicators were observed, but the confirmed blacklist status is sufficient to make credentials, account access, and financial interaction

inappropriate. The single abuse report associated with shared CDN infrastructure is not treated as evidence against this specific site because the attribution is explicitly discounted as provider-level shared infrastructure.

EVIDENCE

- The captured homepage returns HTTP 404 content stating “Object not found” and that the object is not publicly accessible.
- External security evaluation records 18 malicious detections and 1 suspicious detection for the assessed endpoint.
- The assessed endpoint is recorded as blacklisted; the associated shared-infrastructure abuse report has zero confidence and is explicitly attributed to the CDN provider rather than uniquely to the site.

Regulatory Verification Notes

The real-world operator remains unverified, and the available page does not identify a legal entity, regulated service, license, registration number, or accountable business contact. Because the only accessible content is an object-storage error page, the regulatory and governance disclosures cannot support a legitimacy determination. The absence of a broker or similar third-party name match provides no positive regulatory conclusion. The domain is very recent, and its transport security is valid but limited to domain validation; neither characteristic establishes operator identity or authorization.

EVIDENCE

- The assessed domain is approximately 0.104 years old, equivalent to 38 days.
- The available historical record contains 5 snapshots in 2026.
- The site is served on AS13335 by CLOUDFLARENET - Cloudflare, Inc., US.
- TLS is issued by YE1 at DV validation level and is valid to 2026-12-06.

What to Verify Next

Before any sensitive interaction, an independent source should confirm that this exact host is an authorized endpoint for a known organization. Any claimed financial, investment, brokerage, or payment service should be checked against the relevant regulator’s official register using the independently identified legal entity, not information supplied by the site. Credentials, account recovery data, payment details, wallet approvals, and funds should not be submitted unless the endpoint is independently validated and the service relationship is confirmed. Official support or contact channels should also be confirmed through an independent, offline route.

EVIDENCE

- The accessible page provides no business identity, legal disclosure, licensing information, or transactional terms from which authorization can be confirmed.
- The page contains no login form, sensitive form, or visible transaction mechanism.
- The operator’s identity-verification status is unverified.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The available evidence does not establish a legitimate operator, while the confirmed external malicious and blacklist signals create a material risk of

harmful engagement.

Infrastructure Integrity

The site is protected by Cloudflare’s CDN/WAF, and all observed addresses are CDN edge infrastructure rather than a directly exposed origin. This provides an infrastructure-level mitigation against direct origin exposure, but it does not validate the site’s ownership, content, or safety.

Closing Assessment

Treat the endpoint as read-only at most and do not use it for login, credential submission, financial activity, or account recovery until independent organizational and regulatory validation has been completed.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
 - The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 2606:4700:311b::6812:3222 (Cloudflare, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of `pub-ce02802067934e0eb072f69bf6427bf6.r2.dev`.

- The request stayed on `pub-ce02802067934e0eb072f69bf6427bf6.r2.dev`. It was not redirected to another domain. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about `pub-ce02802067934e0eb072f69bf6427bf6.r2.dev` at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
