- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established, advertising-supported Kannada-language news and television portal that presents current and archived reporting on Karnataka districts, politics, national and international affairs, crime, entertainment, sports, technology, food, and video programming.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing activity, or confirmed malicious reputation signals were observed. The domain's long-established registration and extensive, continuous archival record strongly support provenance consistent with an operating news organization rather than a recently created deceptive property. The homepage contains no login form, sensitive data-collection form, wallet interaction, or credential-harvesting mechanism.

- The domain registration record identifies the organization as "Public tv"; registered 2012-01-12 (~14.56 years old), with registration current to 2027-01-12.
- The web archive contains 733 snapshots spanning 2012-02-23 to 2026-08-01 (15 years tracked), with no suspicious repurposing or established semantic shift.
- The homepage presents a content-rich news portal without hidden forms, sensitive forms, cloaking, or suspected brand impersonation.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no safe-browsing malicious finding, no external threat listing, and no reported abuse associated with the observed address.

Regulatory Verification Notes

Public TV presents itself as a news and media publisher rather than a financial, investment, or brokerage service. The homepage provides navigation to privacy, terms, complaints-redressal, corporate-social-responsibility, and contact pages, which is consistent with an established editorial operation. No regulatory or licensing claim is evident in the supplied page content; the status of any media-specific registration or corporate disclosure is therefore unclear, but this is a limited disclosure-verification point and not evidence of deception. No matching broker-reputation record was identified, which is unsurprising given the site's non-financial business model and carries no adverse implication.

- The homepage identifies the service as "Public TV" and categorizes its material as regional, national, international, crime, entertainment, sports, technology, and video news.
- The homepage navigation exposes privacy, terms, complaints-redressal, CSR, and contact resources.

- The observed pages make no financial-service, brokerage, investment, or cryptocurrency offering and state no associated regulatory claim.
- The site's transport encryption uses a YR1-issued domain-validated TLS certificate, valid to 2026-10-01.

What to Verify Next

Institutional onboarding should confirm that the legal entity and current editorial contact details appearing on the site's policy pages correspond with independent corporate records. Organizations planning advertising, syndication, paid content, or other contractual engagement should additionally validate payment instructions and authorized representatives through an independently obtained business channel.

- The terms, privacy, complaints-redressal, CSR, and contact destinations identified on the homepage provide the appropriate source material for legal-entity and governance review.
- Repeated advertising placements on the homepage indicate that commercial engagement is likely to involve advertising or audience-monetization arrangements.
- The site's extensive district and subject navigation provides a practical baseline against which editorial continuity and official communications can be checked.

Summary Verdict

The website is a legitimate, established, and trustworthy news property. Its identity, operating history, substantive editorial presence, and clean security reputation converge without contradictory evidence. Normal interaction, including account login and standard use where offered, is appropriate.

Infrastructure Integrity

The site uses Cloudflare CDN/WAF protection, with the observed edge address served from AS49981 by WorldStream B.V. in the Netherlands. Only the protected edge was observed; this configuration reduces direct infrastructure exposure but is a security-control signal rather than independent proof of legitimacy.

- The hosting path is served from AS49981 (WorldStream B.V., Netherlands).
- Cloudflare provides the observed CDN/WAF layer, with one edge address and no origin candidate exposed during the assessment.

Closing Assessment

Prospective users may interact with the website normally, while organizations entering commercial or contractual relationships should apply their standard counterparty-authentication and payment-control procedures.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of publictv.in.

- The request stayed on publictv.in. It was not redirected to another domain. CLEAR
- Registration is published under Endurance International Group India Private Limited. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-12. NOTED
- The earliest public archive of this site is from 2012-02-23. CLEAR
- It is hosted on WorldStream, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about publictv.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
