Full analysis

Overview

PublishNews is a Portuguese-language Brazilian editorial news portal covering books, publishing, literature, events, awards, bestseller lists, employment, and services for the publishing industry, supported by advertising, sponsorships, newsletters, events, listings, and reader support.

Scam/Impersonation Risk

No contradictions, phishing indicators, impersonation signals, or confirmed blacklist findings were observed. The homepage presents a coherent editorial publishing model, with recurring sections for market news, interviews, literary events, bestseller rankings, podcasts, employment, and industry services. The content profile is consistent with a mature news and media operation rather than a deceptive transaction site.

- The homepage identifies PublishNews as an editorial portal and displays substantial Portuguese-language publishing-industry content.
- Historical records show 5,000 archive snapshots spanning 2001–2021, covering 21 tracked years.
- The domain was registered on 2001-08-28 and is 24.95 years old.

Regulatory Verification Notes

The site's apparent business is editorial publishing and related media services, not a regulated financial activity. No regulatory license is claimed in the supplied content; this is a disclosure point for commercial due diligence, not evidence of deception. The available reputation context is clean, and the site's long operating history and consistent publishing purpose support its legitimacy.

- The homepage lists advertising, events, newsletters, employment, supplier, and editorial content categories consistent with its stated media model.
- The registered owner is Carrenho Editorial Ltda ME.
- Hosted on AS14061 (DigitalOcean, LLC, US).
- TLS certificate issued by YR2 (DV), valid to 2026-09-06T18:21:55+00:00.

What to Verify Next

For a commercial relationship, confirm the publisher's current corporate and contracting details through the site's Institutional and Contact channels, and independently validate any advertising, sponsorship, event, or supplier arrangement before execution.

- The homepage provides Institutional, Advertising, FAQ, and Contact navigation.

- The site identifies commercial offerings including advertising, sponsorships, events, employment listings, and supplier listings.

Summary Verdict

PublishNews presents as a legitimate, established, and trustworthy editorial entity with a coherent business purpose, substantial historical continuity, clean observed behavior, and no detected contradiction or impersonation signal. Normal interaction, including account login and standard use where offered, is appropriate.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure, with the observed edge address 68.183.31.228 associated with AS14061; the origin server was not observable. This architecture provides a mitigating layer against direct origin exposure but is not, by itself, proof of legitimacy.

Closing Assessment

Normal browsing and routine engagement are appropriate; higher-value commercial arrangements should follow standard procurement and counterparty checks.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about publishnews.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
