Full analysis

Overview

Purely Soul Healing is a small WordPress-based service website presenting remote energy-healing offerings, including house and land clearing and childhood-trauma clearing, with the apparent purpose of attracting prospective clients and arranging paid sessions through its booking and contact channels.

Scam/Impersonation Risk

No contradictions were observed: the reviewed content shows no phishing, brand-impersonation, credential-harvesting, or other high-risk abuse pattern. The site's promotional testimonials and energy-healing claims are consumer-service content rather than technical fraud indicators, although their effectiveness is not independently established by the supplied evidence. External reputation checks reported no malicious or suspicious detections, supporting a low immediate abuse concern while not independently verifying the operator's identity.

EVIDENCE

- The homepage presents service information and testimonials without a login form, hidden form, wallet function, or sensitive-data collection field.
- The contact and booking content was assessed with no page-level red flags and no suspected brand impersonation.
- The domain has 230 archive snapshots spanning 2018–2025, covering 8 tracked years, with no suspicious repurposing or semantic drift identified.
- External checks recorded 0 malicious detections, 0 suspicious detections, and no confirmed blacklist or phishing finding.

Regulatory Verification Notes

The website appears to operate as a private wellness or personal-services business rather than a represented financial or regulated entity. Its real-world operator remains unverified from the supplied evidence, and the reviewed service content does not provide a license number or clearly identified regulatory basis; this is a verification and disclosure gap, not evidence of a scam. Registration and transport-security signals are consistent with a functioning, established web presence, but they do not prove the provider's professional qualifications or legal status.

EVIDENCE

- The domain was registered on 2023-09-02 and is listed as approximately 2.97 years old; the registrar is NAMECHEAP INC.
- The site is served from AS31898, identified as ORACLE-BMC-31898 / Oracle Corporation, US.
- The site uses a DV TLS certificate issued by YR1, valid through 2026-10-09.
- The reviewed service pages contain no stated license number or regulatory authority.

What to Verify Next

Before a paid engagement, the prospective client should independently confirm the practitioner or business identity, the exact service scope, cancellation and refund terms, and the recipient of any payment. Any professional registration or consumer-protection requirement applicable to the services should be checked with the relevant official registry, and contact channels should be confirmed through an independent route before sensitive information is submitted.

EVIDENCE

- The site uses one contact form and no sensitive form was detected during review.
- The service model relies on client-arranged sessions or programs, making written confirmation of terms and payment protections particularly relevant.
- The reviewed page title and content identify the service as “Purely Soul Healing” but do not independently establish a legal entity or practitioner credential.

Summary Verdict

The overall posture is **moderate trust**. Available evidence is consistent with an apparently legitimate, low-threat service website with sustained historical continuity, while independent verification of the real-world operator and applicable professional status remains incomplete. No scam, phishing, impersonation, or blacklist contradiction was observed.

Infrastructure Integrity

The site resolves directly to a single likely origin address without a detected CDN or WAF edge layer, so it has limited edge-level shielding compared with a service deployed behind mainstream perimeter infrastructure. The resolved hosting arrangement is nevertheless technically identifiable and does not, on the supplied evidence, indicate malicious infrastructure.

Closing Assessment

Normal informational browsing is reasonable; independent identity, service-term, and payment-protection checks should be completed before sensitive submissions or high-value commitments.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about purelysoulhealing.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
