

Is purotechsol.com a scam? TrustSniffer's high-risk assessment: 5/100

purotechsol.com

Verdict

5

OUT OF 100

CRITICAL RISK

purotechsol.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Company site for PuroTechSol, an India-based web and mobile app development firm. Contains service descriptions, contact information, phone numbers, email, address, and client testimonials. Main goal is client acquisition via contact form and listed contact channels.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What purotechsol.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

PuroTechSol is a corporate web and mobile application development agency presenting IT consulting, web application and web development, mobile application, API, and network/HSIA services for prospective business clients, with client acquisition conducted through service information, portfolio material, contact channels, and a contact form.

Scam/Impersonation Risk

The site presents a high-risk interaction posture despite its conventional corporate-agency content. External reputation checks recorded multiple malicious detections and a confirmed blacklist status, which are direct contradictions to treating the domain as suitable for sensitive engagement. The available evidence does not indicate brand impersonation, a login form, credential harvesting, wallet-drainer behavior, or other active abuse mechanics on the captured pages; however, those benign page characteristics do not offset the confirmed external reputation findings. Identity verification also remains incomplete, so the on-site presentation of PuroTechSol should not be treated as independently established proof of the operating entity.

EVIDENCE

- External reputation checks recorded 6 malicious detections and 1 suspicious detection; the domain was also recorded on an external blacklist.
- The registration record shows the domain was registered in 2017 and is approximately 8.82 years old.
- Archive records contain 17 snapshots spanning 2018–2025, with 8 years tracked; no suspicious repurposing or semantic category change was identified.

Regulatory Verification Notes

The homepage and corporate sections describe a conventional project-based technology-services business, including IT consulting, web application development, web development, mobile application development, Web API development, and network/HSIA solutions. The available site disclosures do not claim a financial, investment, or other regulated service, and no license or registration number is presented for independent confirmation; this is a regulatory-transparency gap rather than, by itself, evidence of fraud. The site's legal and operating identity remains unverified, while the external reputation finding materially limits the evidentiary value of the otherwise ordinary business presentation.

EVIDENCE

- The homepage identifies PuroTechSol as an IT consulting and web/mobile application solutions provider serving business customers.
- The available business and contact pages describe project or support-based technology services and do not state a regulatory license, license authority, or registration number.
- Hosting is confirmed on AS46606, Unified Layer, US.
- The site uses a DV TLS certificate issued by YR2, valid to 2026-10-26.

What to Verify Next

Before any commercial engagement, an independent corporate-registry check should establish the legal entity behind the PuroTechSol name and confirm that the contracting party matches the entity named on proposals, invoices, and agreements. Any claimed business address, telephone channel, portfolio reference, or client relationship should be validated through independently sourced records rather than through the website alone. If a regulated activity is later proposed, the relevant jurisdictional register should be checked directly before funds, credentials, or sensitive business information are exchanged.

EVIDENCE

- Identity verification is currently unverified, so the website's business description does not independently establish the real-world operator.
- The site's stated model is client acquisition through service descriptions and a contact form, making independent validation of the contracting entity particularly relevant.
- The external reputation finding should be reconciled with the website operator and hosting provider before sensitive interaction is considered.

Summary Verdict

The overall posture is **critical risk for sensitive interaction**. The site’s ordinary agency presentation and stable technical operation are outweighed by confirmed external reputation contradictions, and the available evidence is insufficient to establish the operator’s real-world identity with confidence.

Infrastructure Integrity

The site resolves to one likely origin IP, with no CDN edge IPs or detected CDN layer. Its hosting infrastructure is attributable to Unified Layer, while the valid DV TLS certificate provides transport encryption only; these technical controls are mitigating security characteristics, not evidence of legitimacy.

Closing Assessment

Prospective users should restrict activity to passive review and avoid login, credential submission, financial transactions, or sensitive information exchange until the operator and external reputation contradictions have been independently resolved.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [purotechsol.com](#).

- The request stayed on [purotechsol.com](#). It was not redirected to another domain. CLEAR
- Registration is published under [GoDaddy.com, LLC](#). CLEAR
- DNS for this domain is served by [bigrockservers.com](#), across 2 name servers. NOTED
- The registration is paid up to 2027-10-25. CLEAR
- The earliest public archive of this site is from 2018-08-05. CLEAR
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [purotechsol.com](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
