

Is qch.ge a scam? TrustSniffer's high-risk assessment: 0/100

qch.ge

Verdict

0

OUT OF 100

CRITICAL RISK

qch.ge shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Georgian-language site for 'Quality Channel' presenting program listings, audit/reports, contact details and a newsletter subscription prompt; appears to be an informational broadcaster page with low risk.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	10 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	13 years old Registered history	CLEAR

Certificate	Encrypted connection Issued by WE1	NOTED

The page as captured

https://qch.ge/

What qch.ge served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a Georgian-language local television and radio broadcaster presenting program schedules, live broadcasting, audit and compliance reports, contact information, and a newsletter subscription, with an apparent informational and media-distribution business model rather than direct online financial services.

Scam/Impersonation Risk

The site's visible content is consistent with an informational broadcaster: page analysis found program listings, contact details, audit material, a live-broadcast option, and no login or sensitive-data form. However, this benign presentation is materially outweighed by confirmed external reputation contradictions, including multiple malicious detections, a suspicious detection, and a confirmed blacklist hit. The available evidence does not establish that the site is impersonating a named brand or operating a phishing form, but the external detections create a clear risk for credentials, payments, downloads, or other sensitive interaction.

EVIDENCE

- External reputation assessment: 10 malicious detections and 1 suspicious detection across 16 evaluations; a Tier-1 security provider also flagged the domain.
- External reputation assessment: confirmed blacklist status; general web-safety checking was not malicious.
- Homepage: Georgian-language broadcaster content with program schedules, a live option, newsletter subscription, and no observed login or sensitive form.
- Domain registration record: registered 2013-10-02, approximately 12.89 years old.

Regulatory Verification Notes

The site presents an “About” area, 2023 audit conclusions, broadcaster-law reports referencing Articles 70 and 61, a compliance declaration, and a contact page. These materials provide substantive operational context, but the available evidence does not independently verify the operator’s real-world identity or regulated status, and no license number or licensing authority is claimed on the site. The legal and compliance material should therefore be treated as self-published information rather than confirmation of authorization. The site’s transport and hosting records are technically established, but those controls do not validate the organization behind the service.

EVIDENCE

- Registration record: registrar listed as registrar.ge; creation date 2013-10-02T00:00:00Z and expiration date 2026-10-03T00:00:00Z.
- Hosting record: served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- TLS record: DV certificate issued by WE1, valid through 2026-10-18T01:48:01+00:00.
- Legal and compliance pages: audit conclusion for 2023, broadcaster-law reports for 2023 and 2025, and a compliance declaration are presented.

What to Verify Next

Before any sensitive interaction, an independent check should confirm the broadcaster’s legal entity and authorization with the relevant Georgian corporate and media-regulatory registers. Contact details should be confirmed through an independently sourced route rather than relying solely on the website. Any file, browser prompt, subscription request, or account-related workflow should be assessed in an isolated environment until the external reputation contradiction is resolved.

EVIDENCE

- Legal and compliance pages: use the stated audit and broadcaster-law materials as references for independent registry and authorization checks.
- Contact page: independently validate the listed organization and contact channels before exchanging information.
- Homepage and newsletter area: review any subscription or download workflow without submitting credentials or payment information.

Summary Verdict

The overall posture is **critical trust risk**. Although the site presents a coherent media-oriented service and contains substantive broadcaster material, confirmed external threat detections and blacklist status prevent the available evidence from supporting safe sensitive interaction or independent identity confidence.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were Cloudflare edge endpoints, including 104.21.62.189, 172.67.138.112, 2606:4700:3034::ac43:8a70, and 2606:4700:3037::6815:3ebd; no origin server address was observable. This provides a mitigating layer against direct exposure, but CDN protection is not evidence of operator legitimacy and cannot offset the external reputation findings.

Closing Assessment

Prospective users should restrict activity to passive viewing and avoid account, credential, payment, download, or other sensitive interaction until independent identity, authorization, and contact-channel checks have been completed and the external warnings have been resolved.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of qch.ge.

- The request stayed on qch.ge. It was not redirected to another domain. CLEAR
- Registration is published under registrator.ge. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-03. NOTED
- The earliest public archive of this site is from 2017-05-28. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about qch.ge at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
