- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

QISC is a Vietnamese corporate website for Công ty TNHH MTV Đầu tư, xây dựng và kinh doanh dịch vụ Quảng Ngãi, presenting company information, industrial-park and urban-development projects, construction and maintenance services, utilities, fuel and gas supply, news, and recruitment; its apparent business model is regional infrastructure investment and related commercial services.

Scam/Impersonation Risk

No contradictions were observed. The site consistently presents a corporate operating model rather than a deceptive consumer or investment proposition, with company information, organizational content, project listings, news, recruitment, a physical address, and a telephone contact on its pages. The technical review found no phishing indicators, login form, hidden sensitive form, wallet-connection behavior, or suspected brand impersonation, while available external reputation checks reported no malicious or suspicious detections. The site's historical continuity is consistent with an established presence, although the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage and company-information pages identify QISC as Công ty TNHH MTV Đầu tư, xây dựng và kinh doanh dịch vụ Quảng Ngãi and provide an address in Quảng Ngãi, Vietnam.
- The site's behavioral examination recorded two successful runs, no login form, no hidden forms, zero wallet-connect or wallet-drainer activity, and no cloaking classification.
- Domain continuity evidence indicates an age of 9.48 years; archival records show 83 snapshots from 2017-02-24 through 2026-04-22 across 10 years tracked.

Regulatory Verification Notes

The website provides substantial corporate and operational information, including organizational units, business lines, projects, company news, recruitment, and a dedicated corporate-information area. The presented activities include industrial-park infrastructure leasing, urban and residential real estate, construction, project-management consultancy, maintenance, water and wastewater services, landscaping, worker accommodation, and fuel and gas supply. No specific license claim or license number is presented in the supplied content; this is a verification point for the particular service or transaction, not evidence of deception. The available broker-reputational context contains no match, and the site's clean technical and content signals support an apparently legitimate corporate presence, while not independently proving the operator's legal identity or regulatory standing.

EVIDENCE

- The company, business-lines, project, corporate-information, and recruitment pages identify a corporate/B2B operating profile with no reported content red flags.
- The site is hosted on AS56150, VHOST-AS-VN - Viet Solutions Services Trading Company Limited, VN.
- The site's TLS certificate is issued by YE2, uses DV validation, and is valid to 2026-10-17T10:08:34+00:00.

What to Verify Next

Before a contractual, property, leasing, employment, or payment commitment, independently confirm the relevant legal entity and the authority of the named contact through an official corporate or sector registry. For any regulated or permit-dependent activity, confirm the applicable license, approval, or project authorization with the responsible Vietnamese authority. Standard payment-protection terms, contractual remedies, refund or cancellation provisions, and official contact channels should also be confirmed through independent sources before credentials or payment details are exchanged.

EVIDENCE

- The site contains a “Công bố thông tin doanh nghiệp” corporate-disclosure area but the supplied content does not include an independently verified registration or licensing reference.
- The contact page provides a company telephone channel and a Quảng Ngãi office address for independent confirmation.
- The website describes multiple commercial and infrastructure services whose applicable approvals may vary by activity and transaction.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate corporate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or other contradictory signal was identified, although the operator’s real-world identity is not independently verified.

Infrastructure Integrity

The site resolves directly to a single Vietnamese hosting environment rather than a detected CDN edge, with no separate WAF or CDN layer identified. This infrastructure arrangement is a neutral operational observation; the valid TLS deployment provides transport protection but does not, by itself, establish corporate identity.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture, while independent entity, transaction, and payment-protection checks should be completed before material commercial or credential-related engagement.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of qisc.com.vn.

- The request stayed on qisc.com.vn. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2017-02-24. CLEAR
- It is hosted on VHOST-AS-VN, from a server in VN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about qisc.com.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
