Full analysis

Overview

The website is an established Brazilian ecommerce storefront selling QIX-branded skate shoes, streetwear, apparel, and accessories directly to consumers through conventional online retail transactions.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, deceptive financial propositions, or other fraud signals were observed. The homepage presents coherent merchandise listings, visible prices, ordinary PIX and card-payment options, shipping terms, returns information, and customer-support channels. Promotional claims—free nationwide shipping above R\$199.90, a 5% first-purchase discount, and interest-free card instalments—are consistent with the disclosed retail model. The domain's long history, sustained archival continuity, established traffic presence, and clean external threat reputation provide convergent evidence that this is the longstanding QIX retail operation rather than a recently created imitation.

- Domain-registration records identify RED RIVER INDUSTRIA, COMERCIO E MARKETING LTDA as the owner; registered 2010-09-08 (~15.91 years old), with expiration on 2028-09-08.
- The web archive contains 306 snapshots spanning 2010-09-17 to 2026-06-06 (17 years tracked), with no suspicious repurposing or semantic drift established.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no phishing finding, and no confirmed adverse listing for the domain.
- The domain holds a global traffic rank of 211,182 and is within the top one million websites.

Regulatory Verification Notes

The homepage provides a physical address, Brazilian company-registration information, policies, and customer-service details, creating a clear commercial identity for an ordinary retailer. The site does not present itself as a broker, financial intermediary, crypto platform, or regulated investment service, and no licensing claim is made; consequently, the absence of a financial-services licence is not an adverse indicator for the observed business model. Transport encryption is valid and appropriate for routine ecommerce use.

- The homepage displays a Brazilian company-registration number, physical business address, support channels, payment terms, shipping conditions, and return policies.
- The homepage describes direct retail sales of footwear, clothing, and accessories; no cryptocurrency, investment, brokerage, or financial-return proposition appears.

- The site's transport encryption uses a DV certificate issued by YE1, valid to 2026-09-17.

What to Verify Next

Routine transaction controls remain appropriate: purchasers should confirm that the merchant identity shown during checkout and on payment records corresponds to the disclosed operating company, review the applicable delivery and return terms before ordering, and retain the order confirmation and payment receipt. Official customer-service channels can be confirmed independently before resolving any payment or fulfilment dispute.

- The checkout proposition advertised on the homepage supports PIX and card payments, including up to four interest-free instalments.
- The homepage supplies shipping, returns, privacy, and customer-support information suitable for review before purchase.

Summary Verdict

The website presents as a legitimate, established, and trustworthy ecommerce operation. Its coherent commercial identity, sustained operating history, clean reputation, and conventional transaction model support normal interaction, including account login, checkout, and standard purchases.

Infrastructure Integrity

The site is served through Cloudflare's CDN/WAF, with the observed address belonging to an edge network rather than a directly exposed origin. This reduces direct infrastructure exposure and provides a useful security control, although protective hosting alone is not evidence of business legitimacy.

- The hosting infrastructure resolves to 23.227.38.65 on AS13335 (CLOUDFLARENET – Cloudflare, Inc., US), geolocated to Canada.
- One CDN edge address was observed, and no origin-server candidate was exposed during the assessment.

Closing Assessment

Prospective customers may use the site normally while applying standard ecommerce practices, including reviewing order terms and retaining transaction records.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about qixskateshop.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
