

Is qualityautomacao.com.br safe? TrustSniffer's low-trust assessment: 40/100

qualityautomacao.com.br

Verdict

40

OUT OF 100

LOW TRUST

qualityautomacao.com.br is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 70%.

What this site appears to be

Commercial website for webPosto, a cloud SaaS platform for managing fuel stations (POS, inventory, fleet, convenience, mobile app, integrations). Includes customer testimonials, contact form, address and phone, and blog entries. Appears to be an established vendor targeting Brazilian market.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website presents webPosto as a Brazilian cloud-based software platform for fuel-station management, offering tools for point-of-sale operations, inventory, fleet services, convenience stores, restaurants, mobile use, and business integrations. Its apparent business model is subscription-based SaaS and enterprise deployment for fuel-station operators.

Scam/Impersonation Risk

A confirmed blacklist hit creates a material risk for sensitive interaction, despite the homepage presenting a coherent commercial SaaS proposition with customer testimonials, contact facilities, and no visible phishing form. External reputation checks also recorded one malicious and one suspicious detection, while behavioral testing identified elevated external activity, substantial post-interaction DOM changes, and repeated console errors. These signals do not establish that the business model itself is fraudulent, and no separate identity contradiction or brand-impersonation finding was observed; however, the confirmed blacklist signal is sufficient to require a security-forward posture for credentials, account access, or financial engagement.

EVIDENCE

- The homepage presents webPosto as a fuel-station management SaaS product, with product sections covering Pista, Frota, Oil, Conveniência, Restaurante, and administrative management; no sensitive login form was observed.
- External reputation checks recorded `external\_blacklist: true`, with one malicious and one suspicious detection.
- Behavioral testing recorded 24 external XHR requests, 8 external POST requests, a maximum external-activity proportion of 95%, 1,280 DOM mutations, and 16 console errors across two successful runs.
- Domain-history records show 14 archive snapshots spanning 2004–2025, covering 22 tracked years.

Regulatory Verification Notes

The site's apparent commercial purpose is software provision rather than a regulated financial service, and the available pages identify a business operator as Quality Automacao Ltda. Nevertheless, the on-page disclosure state is unclear, and no license claim, licensing authority, or license number is recorded in the available content. This is a regulatory and corporate-verification gap rather than, by itself, evidence of fraud. The available third-party broker dataset returned no match, which is only a contextual reputational signal and does not verify licensing or legal standing.

EVIDENCE

- The homepage and contact content identify the service as webPosto and provide a contact form, address, phone information, testimonials, and blog material.
- Registration data lists Quality Automacao Ltda as the domain owner; the domain was registered on 2015-10-16 and expires on 2027-10-16.
- The domain's hosting technical record is AS16509, Amazon.com, Inc., US.
- The site's TLS certificate is DV-validated, issued by Amazon RSA 2048 M04, and valid through 2026-12-17.

What to Verify Next

Before any sensitive engagement, independently confirm that Quality Automacao Ltda is the entity authorized to provide webPosto services and obtain contractual, billing, privacy, support, and termination terms through independently sourced business channels. Where the service involves access to operational or customer data, confirm the applicable data-processing responsibilities and security commitments in signed documentation. Official contact channels should also be confirmed through an independent, offline route before credentials or payment details are exchanged.

EVIDENCE

- The site provides a single contact or lead-capture form and identifies a Brazilian-market commercial software offering.
- The available content contains no recorded license number, licensing authority, or verified regulatory registration.
- Identity verification remains unverified in the available assessment evidence.
- The site has no observed password form, hidden form, wallet interaction, clipboard-hijacking behavior, or external password submission.

Summary Verdict

The overall posture is **low trust for sensitive interaction**. The site has a credible-looking SaaS presentation and some established technical characteristics, but those positive elements do not offset the confirmed external reputation contradiction and the unresolved independent identity connection. The evidence therefore supports limited confidence in ordinary site presentation, not approval for account, credential, or financial use.

Infrastructure Integrity

The site is delivered through Amazon CloudFront CDN/WAF infrastructure, with all observed addresses resolving to CDN edge servers and no origin candidate observed. This provides a meaningful exposure-control measure, but edge protection is a mitigating technical factor only and does not establish the legitimacy of the operator or content.

Closing Assessment

Treat the website as unsuitable for sensitive interaction until the operator, contractual relationship, and official communication channels have been independently confirmed; any engagement should remain limited to non-sensitive review while those checks are completed.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01

Governance Risk
 - The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02

Sensitive Interaction Risk
 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
 - Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
 - The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of qualityautomacao.com.br.

- The request for qualityautomacao.com.br ended on www.webposto.com.br, a different domain. WATCH
- DNS for this domain is served by co.uk, across 3 name servers. NOTED
- The registration is paid up to 2027-10-16. CLEAR
- The earliest public archive of this site is from 2004-04-30. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about qualityautomacao.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
