

Is qualityexpressllc.org a scam? TrustSniffer's high-risk assessment:
0/100

qualityexpressllc.org

Verdict

0

OUT OF 100

CRITICAL RISK

qualityexpressllc.org shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Small product landing page for Quality Express LLC promoting an AI site builder with free credits and an email contact form. Basic content, cookie notice, and reCAPTCHA message present. No payment flows or financial promises visible.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://qualityexpressllc.org/>

What qualityexpressllc.org served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a small landing page for Quality Express LLC presenting an AI site-builder service, advertising 50 free credits and inviting visitors to start the product or submit an email for updates and promotions; its apparent business model is software-service or credit-based lead capture rather than financial activity.

Scam/Impersonation Risk

The site's visible content does not itself show an impersonation, phishing form, payment flow, financial promise, or other overt fraud mechanism. However, this benign presentation is materially outweighed by confirmed external security contradictions: the domain is blacklisted, and 17 malicious detections were recorded across external reputation checks, including detections by multiple established security vendors. The available evidence does not establish that the site is impersonating a named brand, and no conflicting legal-entity names were observed, but the confirmed blacklist and malicious detections make sensitive interaction inappropriate. Abuse reports associated with the observed Amazon-hosted IP are attributed to shared infrastructure, so they are contextual rather than proof that Quality Express LLC generated those reports.

EVIDENCE

- The homepage presents “Quality Express LLC,” an AI site builder, 50 free credits, and an email-signup form; no login or payment form was observed.
- External reputation checks recorded 17 malicious detections and a confirmed blacklist for the website.
- The observed address 76.223.105.230 had 13 abuse reports attributed to shared Amazon.com, Inc. infrastructure used as a content-delivery network.
- The domain was registered on 2021-05-24 and is approximately 5.24 years old; archival records contain 4 snapshots across 2021, 2022, and 2024, with coverage from 2021-12-20 through 2025-07-14 and 5 years tracked.

Regulatory Verification Notes

The landing page identifies the business as Quality Express LLC but provides only limited corporate context. No licensing or registration number relevant to the advertised software service is visible in the supplied site content, and the available evidence does not independently verify the operator’s identity. This is a regulatory and disclosure gap rather than a standalone finding of fraud. The site does not present financial services, investment returns, or other regulated financial claims; nevertheless, the external blacklist and malicious-detection results require the operator and service provenance to be treated as unverified. The valid transport certificate and mainstream hosting arrangement support technical availability, not legal legitimacy.

EVIDENCE

- The homepage title and repeated page branding identify “Quality Express LLC,” while the supplied content contains no fuller legal, registration, or licensing disclosure.
- The domain registration record lists GoDaddy.com, LLC as registrar, with creation date 2021-05-24 and expiration date 2031-05-24.
- The site is served on AS16509 by AMAZON-02 - Amazon.com, Inc., US.
- TLS uses a DV certificate issued by GoDaddy TLS Intermediate CA DV - R1v1, valid through 2026-09-30.

What to Verify Next

Before any sensitive interaction, an independent corporate-registry check should confirm that Quality Express LLC exists and that the operator controls the advertised service. The service’s official support and contact channels should be confirmed through an independent route, and any later request for payment, software installation, account access, or personal information should be validated against independently sourced business details. Security operations should also confirm whether the blacklist detections have been remediated and whether the domain is cleared by the relevant security providers before permitting access from trusted environments.

EVIDENCE

- The supplied site content consists of a single landing/contact experience with one email-signup form and no independently linked corporate or social presence.
- The page states that reCAPTCHA and Google privacy and terms provisions apply, but these statements do not independently establish operator identity.
- The observed behavior generated 121 external XHR requests, including 112 non-whitelisted requests, and 2 non-whitelisted POST requests across 2 successful runs.
- The page produced 10 console errors during behavioral observation, while no hidden forms, wallet activity, credential forms, or clipboard-hijacking behavior was observed.

Summary Verdict

The website has a **critical trust posture** and presents material risk for sensitive interaction. Its apparently ordinary SaaS landing-page content does not overcome the independently recorded malicious detections and confirmed blacklist status. Operator identity remains unverified, so the site should not be treated as an established or independently authenticated business.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, with observed edge addresses 13.248.243.5 and 76.223.105.230, both on AS16509 and operated by AMAZON-02 - Amazon.com, Inc., US; no origin-server candidate was observed. This infrastructure provides an operational mitigation by shielding the origin, but edge hosting and protective network controls do not establish legitimacy and may limit independent verification of the hosting environment.

Closing Assessment

Prospective users and enterprise controls should restrict the site to passive observation and block login, credential submission, software installation, and financial activity until independent identity verification and external security clearance are obtained.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 13 reports on hosting IP 76.223.105.230 (Amazon.com, Inc., Content Delivery Network), 26% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of qualityexpressllc.org.

- The request stayed on qualityexpressllc.org. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by domaincontrol.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2031-05-24. [CLEAR](#)
- The earliest public archive of this site is from 2021-12-20. [CLEAR](#)
- It is hosted on AMAZON-02, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about qualityexpressllc.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
