

Is qualitypost.com.mx legit? TrustSniffer's high-trust assessment: 80/100

qualitypost.com.mx

Verdict

80

OUT OF 100

HIGH TRUST

qualitypost.com.mx appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

QualityPost is a Mexico-focused courier and logistics company website offering shipping services, dedicated drivers, banking pouches, priority and COD options with quote and contact forms for enterprises.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

QualityPost is a Mexico-focused courier and logistics website presenting express shipping, dedicated drivers, banking and commercial pouch services, priority delivery, cash-on-delivery options, shipment tracking, and quote/contact pathways for business and consumer customers.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent logistics-service model, uses ordinary quote and contact flows, and shows no login form, credential-harvesting pattern, wallet interaction, brand-impersonation indicator, or phishing behavior. The only adverse external signal is abuse reporting against a shared delivery address associated with Webflow infrastructure; that attribution does not establish malicious activity by QualityPost. External reputation checks found no malicious or suspicious classification, and the domain has sustained historical continuity consistent with an established web presence.

EVIDENCE

- The homepage presents express courier services, dedicated messengers and drivers, banking and commercial pouch handling, priority delivery, COD services, shipment tracking, and quote/contact options.
- Domain registration record: registered 2006-06-12; age 20.18 years; expiration 2027-06-11.
- Web archives contain 330 snapshots spanning 2007-05-04 to 2026-08-09, covering 20 years with a maximum observed gap of 1 year.
- Five abuse reports concern shared infrastructure at 198.202.211.1, attributed to Webflow, Inc. as a content delivery network rather than specifically to QualityPost.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate commercial logistics site, but it does not independently verify the real-world operator. The visible content describes services and customer pathways without presenting a licensing claim or licensing number; this is a regulatory-disclosure point to resolve where a particular service or jurisdiction requires authorization, not evidence of a scam. The registration record identifies AKKY ONLINE SOLUTIONS, S.A. DE C.V. as registrar and Mahatma Rodriguez as registrant, but those details do not by themselves prove that the registrant operates the website. No matching third-party broker profile was identified.

EVIDENCE

- The site's navigation exposes Services, Clients, Contact, shipment tracking, and quotation functions; the supplied page content contains no licensing authority or license number.
- Domain registrar: AKKY ONLINE SOLUTIONS, S.A. DE C.V.
- The site's transport encryption uses a WE1-issued DV TLS certificate valid to 2026-09-23.
- The website is served through AS209242, identified as CLOUDFLARESPECTRUM - Cloudflare London, LLC, US.

What to Verify Next

Before credential or payment interactions, the prospective customer should independently confirm the legal entity responsible for contracting, obtain the applicable service-level, cancellation, claims, and return terms, and confirm any licensing or registration requirement with the relevant Mexican authority or commercial registry. Contact details should be validated through an independently sourced business record or offline channel, and payment arrangements should preserve standard commercial dispute and payment-protection rights.

EVIDENCE

- The Contact and quotation pathways are the appropriate pages for reconciling the contracting entity, service terms, and operational points of contact.
- The Services and Clients pages provide the business-service context against which service-level and delivery claims should be checked.
- The shipment-tracking page should be tested with a legitimate reference supplied through an independently confirmed business engagement.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradiction. The operator's real-world identity remains independently unverified, so the legitimacy assessment is evidence-consistent rather than proven.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with the observed edge address 198.202.211.1 on AS209242; no origin server address was observable in this analysis. This arrangement is a mitigating infrastructure signal because it reduces direct origin exposure, but it is not proof of business legitimacy.

EVIDENCE

- Hosting provider and network: AS209242, CLOUDFLARESPECTRUM - Cloudflare London, LLC, US; observed edge IP 198.202.211.1.
- CDN/WAF status: Cloudflare detected; unique IP count 1, edge IP count 1, likely origin IP count 0.
- TLS certificate: issuer WE1, validation level DV, valid through 2026-09-23T06:32:48+00:00.

Closing Assessment

The site is suitable for ordinary commercial evaluation, provided that the contracting identity, applicable terms, and payment protections are independently confirmed before credentials or payment details are submitted.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 5 reports on hosting IP 198.202.211.1 (Webflow, Inc, Content Delivery Network), 23% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of qualitypost.com.mx.

- The request stayed on qualitypost.com.mx. It was not redirected to another domain. CLEAR
- Registration is published under AKKY ONLINE SOLUTIONS, S.A. DE C.V.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-11. NOTED
- The earliest public archive of this site is from 2007-05-04. CLEAR
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about qualitypost.com.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
