

Is quantx-group.com safe? TrustSniffer's low-trust assessment: 25/100

quantx-group.com

Verdict

25

OUT OF 100

LOW TRUST

quantx-group.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-10-01 by automated analysis. Classification confidence 75%.

What this site appears to be

HTTP 401 Authorization Required response with no additional public content. Appears to be an access-protected resource; no service description or contact details available.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

## The page as captured

<https://quantx-group.com/>

# 401 Authorization Required

nginx/1.24.0 (Ubuntu)

What quantx-group.com served when TrustSniffer captured it on 2026-10-01. The page may look different now.

## Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2026.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

## Full analysis

### Overview

The website is an access-protected resource that presents visitors with an HTTP 401 Authorization Required response rather than a public service description, product catalogue, pricing information, or contact channel. Its apparent purpose and business model therefore cannot be established from the publicly accessible page.

### Scam/Impersonation Risk

The site presents a **material sensitive-interaction risk**. It is currently blacklisted by external reputation sources, including two malicious detections, and this adverse signal is decisive despite the absence of observed brand impersonation or conflicting legal identities. The homepage provides only an authentication-gated response with no context, making it impossible to establish what service a prospective user would be accessing or why credentials would be required. The available evidence does not establish the real-world operator's identity.

#### EVIDENCE

- The homepage returned “401 Authorization Required” and exposed no public business, product, pricing, or contact context.
- External reputation assessment recorded 2 malicious detections and a confirmed blacklist status.
- Domain registration: 2026-01-13; approximately 0.71 years old.
- Web archive: 91 snapshots, first seen 2026-03-24, last seen 2026-07-19, with 1 year tracked.

### Regulatory Verification Notes

No legal, licensing, registration, or governance information is available on the public page because access is restricted before any such disclosures can be reviewed. This is a significant verification gap for any service that might involve financial activity, and the operator’s identity remains unverified. The domain is registered through TUCOWS.COM, CO., while the recorded registrant and organization are privacy-redacted; this is an administrative registration detail, not independent evidence of legitimacy. A valid transport certificate confirms encrypted connectivity only and does not validate the operator or business.

#### EVIDENCE

- Domain registrar: TUCOWS.COM, CO.; registrant and organization fields are privacy-redacted.
- Hosting network: AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- TLS certificate: issuer WE1, validation level DV, valid to 2026-12-07T10:26:19+00:00.
- The homepage contained no visible license number, licensing authority, company disclosure, or contact details.

### What to Verify Next

Before any sensitive interaction, an independent corporate-registry and relevant regulatory-registry check should establish the operator’s legal identity and any authorization required for the underlying service. The authentication endpoint should be validated through an independently obtained contact route rather than through the gated page itself. Credentials and financial information should remain withheld until the external blacklist status has been resolved and the operator can provide independently corroborated disclosures.

#### EVIDENCE

- The public homepage supplies no operator identity or business-purpose information to compare against an external registry.
- The restricted page supplies no independent contact route for validating the authentication request.
- The recorded regulatory status cannot be established from the site’s public content.

### Summary Verdict

The available evidence supports a low-trust, high-risk posture for sensitive interaction. The site's identity and purpose are unverified, while the confirmed external reputation contradiction materially outweighs the limited technical indicators of ordinary web operation.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses are Cloudflare edge servers rather than a directly exposed origin. This provides a mitigating layer against straightforward origin exposure but does not establish legitimacy and can limit independent verification of the underlying host.

Closing Assessment

Prospective users should not log in, submit credentials, or conduct financial transactions through the site unless its operator, authorization, and adverse reputation status have first been independently validated.

Written analysis generated 2026-10-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

3 findings contributed to this verdict, raised by external reputation, page content, registration and ownership.

- 01 External reputation

  - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT\_BLACKLIST\_CRITICAL
- 02 Page content

  - The page shows few of the signs expected from a trustworthy operator.

Page content rule:PAGE\_TRUST\_QUALITY\_LOW

  - The page content shows at least one warning sign that deceptive sites commonly use.

Page content rule:PAGE\_RED\_FLAGS\_SOME

  - The page presents a sign-in form, and the operator behind it could not be independently verified.

Page content rule:PAGE\_TYPE\_LOGIN\_UNVERIFIED

  - The page has very little readable content.

Page content rule:PAGE\_CONTENT\_THIN
- 03 Registration and ownership

  - The registration record withholds contact details for the operator.

Registration and ownership rule:KF\_WHOIS\_HIDDEN

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of quantx-group.com.

- The request stayed on quantx-group.com. It was not redirected to another domain. CLEAR
- Registration is published under TUCOWS.COM, CO.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-01-13. CLEAR
- The earliest public archive of this site is from 2026-03-24. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about quantx-group.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
