Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the official visitor-information presence for Queen Elizabeth Olympic Park in east London, presenting events, sporting and cultural venues, parklands, dining, travel guidance, community programmes, and commercial opportunities such as venue hire, sponsorship, advertising, and filming.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, impersonation signals, or other deceptive behaviours were observed. The homepage presents a coherent public-service identity across its visitor, community, governance, and commercial content, while external reputation checks found no malicious or suspicious classifications. The long-established domain and consistent park-focused content support a legitimate institutional presence.

- The homepage consistently identifies Queen Elizabeth Olympic Park and describes its venues, attractions, visitor services, community initiatives, and East Bank institutions.
- The domain was registered in 2010 and is approximately 15.82 years old; registration is maintained through MarkMonitor Inc. until 2028.
- Reputation telemetry recorded zero malicious and zero suspicious classifications, no malicious safe-browsing finding, no abuse reports, and no matching threat signatures.
- Behavioural testing found no cloaking, hidden forms, credential-harvesting forms, suspicious inline scripts, clipboard interference, or cryptocurrency-wallet activity.

Regulatory Verification Notes

The website operates as a public destination and visitor-information service rather than as a financial, investment, or brokerage platform. Its navigation provides routes to “Who we are,” “How we work,” “Board and committees,” contact information, accessibility material, and community and sustainability content. No financial licence is claimed, and none is ordinarily implied by the activities presented. The supplied homepage evidence does not establish the precise legal entity responsible for every venue, event, or commercial engagement, so contractual counterparties should be identified from the applicable transaction documents rather than inferred solely from the park brand.

- The homepage classifies its purpose through visitor planning, public access and safety, events, education, community programmes, jobs, venue hire, sponsorship, advertising, and filming opportunities.
- The site navigation exposes dedicated institutional-information routes covering organisational identity, working practices, boards, committees, employment, and contact channels.
- The sole observed form is a mailing-list registration form; it does not request passwords or other sensitive account credentials.

- The site has a valid DV TLS certificate issued by YR1, valid until 9 October 2026.

What to Verify Next

For ticket purchases, venue bookings, sponsorships, filming arrangements, or other material commitments, the named contracting entity, payment recipient, cancellation terms, and event operator should be checked in the relevant transaction documents. Official event details should be reconciled with the named venue or organiser, and contact channels should be confirmed through independently sourced institutional details when handling significant commercial matters.

- The homepage promotes multiple independently operated or branded venues, including London Stadium, London Aquatics Centre, Copper Box Arena, Lee Valley VeloPark, and ArcelorMittal Orbit.
- Commercial pathways include venue hire, events and filming, advertising, and sponsorship, each of which may involve transaction-specific counterparties and terms.
- The site also presents external institutional participants within East Bank, including UCL East, V&A East, London College of Fashion, Sadler’s Wells East, and BBC Music Studios.

Summary Verdict

This is a legitimate, established, and trustworthy public-service website with a coherent institutional identity, mature content, clean external reputation, and benign observed behaviour. Normal interaction and standard use are appropriate, including account login if such functionality is offered through an official service pathway.

Infrastructure Integrity

Fastly provides the site’s CDN/WAF layer, and all observed addresses were Fastly edge servers rather than direct origin infrastructure. This reduces direct server exposure and provides a conventional protective control, although infrastructure protection is supporting evidence rather than independent proof of legitimacy.

- The site is served from AS54113 (FASTLY – Fastly, Inc., US).
- Two CDN edge addresses were observed: one IPv4 and one IPv6 address, both associated with AS54113.
- No origin-server candidate was exposed during the infrastructure observation.

Closing Assessment

Normal visitor and account use is appropriate; material payments or commercial commitments should proceed under routine organisational procurement, counterparty, and transaction controls.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of queenelizabetholympicpark.co.uk.

- The request stayed on queenelizabetholympicpark.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under Markmonitor Inc. [Tag = MARKMONITOR]. CLEAR
- DNS for this domain is served by markmonitor.com, across 7 name servers. NOTED
- The registration is paid up to 2028-10-07. CLEAR
- It is hosted on FASTLY, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about queenelizabetholympicpark.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
