What quimicakubo.com.ar served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This Spanish-language website presents Química KUBO as a chemical manufacturer and distributor serving industrial businesses, retailers, and consumers in Mar del Plata and surrounding areas, with a catalog covering industrial and household chemical products, cleaning supplies, pool products, pest-control items, automotive care, gardening, and laboratory materials.

Scam/Impersonation Risk

No contradictions were observed: the reviewed pages show no brand impersonation, phishing, credential-harvesting, financial solicitation, or suspicious transaction mechanism. The homepage is a conventional corporate and product-catalogue presentation, with no login or sensitive-data form, while behavioral testing found no hidden forms, password submission, wallet activity, clipboard manipulation, or cloaking. Two suspicious inline scripts and sixteen console errors were observed, but these appear to be implementation or site-quality anomalies rather than evidence of an impersonation scheme. External reputation checks returned no malicious or suspicious detections, no blacklist result, and no abuse reports.

EVIDENCE

- Homepage: corporate navigation, product information, distribution content, and contact information are present; no login or sensitive form was detected.
- Behavioral testing: 2 suspicious inline scripts and 16 console errors; 0 hidden forms, 0 password-external forms, 0 wallet-connect runs, and 0 cloaking detections.
- Domain continuity: approximately 17.09 years old; archive records contain 51 snapshots spanning 2009–2025, with 17 years tracked.
- External reputation: 0 malicious detections, 0 suspicious detections, 0 blacklist results, and 0 abuse reports.

Regulatory Verification Notes

The site identifies itself as Química KUBO and provides Empresa, Quiénes somos, Historia, Representaciones, Productos, Puntos de venta, and Contacto pages. It states that the business has operated since 1957, serves industry, commerce, and retail customers, operates two establishments, and allocates 4,200 square metres to production, storage, and distribution. These are substantive on-site business claims, but the real-world operator identity is not independently verified. The reviewed content does not present a regulatory licence or registration number; for a chemical manufacturer and distributor, the applicable product, safety, and commercial authorisations should therefore be confirmed independently. The site's commercial presentation and clean technical posture are consistent with an established corporate website, but they do not themselves constitute regulatory verification.

EVIDENCE

- Homepage and company pages: state “Más de 60 años de trayectoria,” operation since 1957, two establishments, and 4,200 m² dedicated to production.
- Product and points-of-sale pages: describe chemical product categories and distribution through regional points of sale.
- Hosting infrastructure: served from AS213230, HETZNER-CLOUD2-AS — Hetzner Online GmbH, Germany.
- Transport security: TLS certificate issued by YR1, DV validation, valid to 2026-10-01.

What to Verify Next

Before credential or payment interactions, an independent check should connect the Química KUBO name and the relevant commercial entity to an authoritative business or industry registry. Any applicable chemical-product, handling, safety, or distribution authorisations should be confirmed with the relevant authority, and return, delivery, and payment-protection terms should be obtained through the site's independently confirmed contact channels. For larger commercial orders, product documentation and the physical distributor details should also be reconciled before funds are committed.

EVIDENCE

- Company pages: provide the business name, history, production description, and regional service area for independent reconciliation.
- Points-of-sale page: identifies the intended distribution model and locations to be checked independently.
- Product pages: define the product categories for which safety and compliance documentation may be relevant.

Summary Verdict

Available evidence supports a high-trust, low-risk posture consistent with an established, apparently legitimate website. No scam or impersonation contradictions were identified, although the assessment does not independently prove the real-world operator’s identity.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and the observed edge address was 5.161.86.7 on AS213230, identified as Hetzner Online GmbH. The origin server was not exposed in the observed resolution, which limits direct origin exposure; this is a mitigating infrastructure characteristic, not proof of legitimacy.

Closing Assessment

Normal browsing and ordinary commercial engagement are proportionate to the assessed posture, subject to routine independent checks of merchant identity, applicable product compliance, contractual terms, and payment protection before sensitive or high-value transactions.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of quimicakubo.com.ar.

- The request stayed on quimicakubo.com.ar. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2009-07-16. CLEAR
- It is hosted on HETZNER-CLOUD2-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about quimicakubo.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
