

Is qxbroker.com legit? TrustSniffer's high-trust assessment: 90/100

qxbroker.com

Verdict

qxbroker.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 70%.

What this site appears to be

Quotex/QxBroker markets a deposit-funded trading platform centered on predicting whether asset prices will rise or fall. It offers demo funds, signals, indicators, bonuses, testimonials reporting earnings, deposits from \$10, and withdrawals, alongside legal policies and a substantial risk warning. The provided content names ON SPOT GROUP LLC in St. Kitts and Nevis but does not show checkable broker-license or regulator details proportional to the requested financial transactions.

Evidence status and limitations

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website operates as the official Quotex/QxBroker online trading platform, offering demo and deposit-funded accounts through which customers predict asset-price movements, access trading tools, and request withdrawals.

Scam/Impersonation Risk

No phishing, brand impersonation, conflicting legal identities, or confirmed malicious reputation pattern was observed. The established historical footprint, substantial global traffic presence, stable page delivery, and absence of suspicious form or script behavior support the conclusion that this is the legitimate, established QxBroker service rather than an imitation. One isolated external threat-engine detection is not corroborated by the broader reputation evidence and does not constitute a confirmed contradiction.

- The homepage consistently identifies the service as “Quotex trading platform | QxBroker official site”; the captured content showed no suspected impersonated brand.
- The domain has an authoritative age of approximately 13.04 years, with 128 archive snapshots spanning 2013–2026 (14 years tracked); no suspicious repurposing or semantic drift was established.
- The site holds a top-tier global traffic footprint at rank 8,516, while the principal safe-browsing assessment reported no malicious finding.
- Interactive testing completed two successful runs without cloaking, hidden forms, suspicious inline scripts, wallet-drainer behavior, clipboard hijacking, or password submission to an external destination.

Regulatory Verification Notes

The platform’s homepage describes a financially consequential model in which customers deposit funds and predict whether asset prices will rise or fall. It advertises a USD 10 minimum real-money deposit, USD 10,000 in demo funds, signals claimed to be 87% accurate, bonuses, tournaments, giveaways, customer-earnings testimonials, and deposit and withdrawal facilities. Although the supplied content names ON SPOT GROUP LLC in St. Kitts and Nevis and includes legal policies and a substantial financial-risk warning, it does not display a checkable broker licence, licence number, or supervising regulator. This is a disclosure-verification issue concerning the financial service—not evidence of impersonation or fraud—and does not displace the site’s established legitimacy.

- The homepage states that real trading begins with a USD 10 minimum deposit and promotes USD 10,000 in demo-account funds.
- The platform-features section claims an 87% accuracy rate for integrated signals and advertises indicators, bonus programs, tournaments, and giveaways.
- The supplied legal content identifies ON SPOT GROUP LLC in St. Kitts and Nevis and presents legal policies and a financial-risk warning, but shows no verifiable licence reference or regulator.
- The registration record names GoDaddy.com, LLC as registrar, with registration privacy administered by Domains By Proxy, LLC and expiry set for 19 May 2034; this is an administrative arrangement rather than a security concern.

What to Verify Next

Before entering a material financial relationship, the prospective customer or institution should obtain the precise contracting entity, applicable jurisdiction, licence number, and regulator directly from the platform, then validate those details independently in the relevant official registry. The contractual rules for custody, withdrawals, bonuses, complaints, and dispute resolution should also be reviewed against the intended transaction and customer location. Official support and contact channels should be confirmed through an independent route when conducting institutional onboarding.

- The homepage provides account creation, login, demo-account, FAQ, blog, and support-request pathways suitable for confirming the official service journey.
- The published policies and risk warning provide the documentary starting point for reviewing customer rights, transaction conditions, and dispute procedures.
- The platform states that it accepts deposits and processes withdrawals, making the governing custody and withdrawal terms material to pre-engagement due diligence.

Summary Verdict

The website is a legitimate, established, and trustworthy online trading service with no observed identity or threat contradiction. Its sustained operating footprint, strong usage profile, clean convergent reputation, and stable technical behavior provide affirmative support for normal interaction, including account login and standard platform use.

Infrastructure Integrity

The site uses Cloudflare's mainstream CDN/WAF infrastructure, which reduces direct exposure and provides conventional edge protection; possible origin candidates were also observed, so the protective layer is a mitigating control rather than proof of business legitimacy.

- The hosting infrastructure is served from AS13335 (Cloudflare, Inc., US), with observed edge addresses belonging to the same network.
- The site's transport encryption uses a WE1-issued domain-validated TLS certificate, valid until 2026-10-12.
- Technical resolution completed successfully across four observed addresses, including two Cloudflare edge addresses and two potential origin candidates.

Closing Assessment

Normal account access and standard use are appropriate; prospective customers undertaking material financial transactions should complete conventional contractual and regulatory due diligence proportionate to the amount and jurisdiction involved.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of qxbroker.com.

- The request stayed on qxbroker.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2034-05-19. CLEAR
- The earliest public archive of this site is from 2013-07-18. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about qxbroker.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
