Full analysis

Overview

R7 is a Brazilian regional B2B distributor of professional hygiene and cleaning products and equipment, presenting solutions for corporate customers across sectors such as healthcare, hospitality, industry, automotive services, agriculture, and facilities management.

Scam/Impersonation Risk

No blacklist, phishing, malware, brand-impersonation, or conflicting-identity indicators were observed. The homepage presents a coherent corporate-distributor model rather than a deceptive payment, investment, or credential-collection operation; it contains no login form, sensitive form, wallet connection, or hidden external password submission. The apparent legitimacy is strong, although the real-world operator remains only likely rather than independently verified.

EVIDENCE

- Domain registration record: created 2006-11-23; age 19.75 years.
- Homepage: categorized as a corporate/distributor site with no detected phishing indicators, brand impersonation, or red flags.
- Homepage behavior: two successful runs, stable HTTP responses, no cloaking, hidden forms, wallet-drainer behavior, or suspicious inline scripts.

Regulatory Verification Notes

The About and homepage content identifies R7 as a distributor operating since 2006 and describes a conventional sale-of-goods and business-support model. The site does not present a license or registration number in the supplied content; for this type of commercial distributor, that is a disclosure point requiring ordinary business verification rather than evidence of deception. A registration record lists “r7 comercio de produtos de higiene e beleza LTDA - EPP,” but this does not independently prove that the website operator and the recorded entity are the same. No matching broker-reputation record or adverse external reputation signal was supplied.

EVIDENCE

- Registration record: owner listed as “r7 comercio de produtos de higiene e beleza LTDA - EPP.”
- Hosting telemetry: served from AS31898, ORACLE-BMC-31898 — Oracle Corporation, US.
- Transport security: TLS certificate issued by YR2, validation level DV, valid to 2026-11-05.
- Contact and social navigation: the site links to Instagram, LinkedIn, and WhatsApp channels.

What to Verify Next

Before credential or payment interactions, the prospective counterparty should independently confirm the company name and commercial authority through the relevant Brazilian business registry, obtain and review written terms for orders, returns, warranties, and service obligations, and confirm payment-protection arrangements with the selected payment provider. Official contact channels should also be cross-checked through an independent route, particularly for higher-value corporate orders.

EVIDENCE

- About page: states that the business has operated since 2006; this claim is suitable for independent registry comparison.
- Product and segment pages: describe professional supplies, equipment, chemicals, disposables, odorizers, and services for multiple business sectors; order terms should therefore be obtained before procurement.
- Contact page: provides the site’s primary business-contact route and should be reconciled with independently sourced company details.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated commercial purpose. No scam or impersonation contradictions were observed, but

the connection between the website and a verified real-world operator remains likely rather than proven.

Infrastructure Integrity

The site resolves to a single Oracle-hosted address in the United States, with no CDN or WAF detected and no separate edge-IP layer identified. This infrastructure is operationally straightforward rather than specially protective; the valid DV TLS certificate provides transport confidentiality but does not establish business identity.

Closing Assessment

Normal browsing is proportionate to the assessment, while independent counterparty, transaction-policy, and payment-protection checks should be completed before credentials or funds are committed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about r7comercio.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
