What rabbids.cc served when TrustSniffer captured it on 2026-09-28. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2026.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website currently resolves to a blank or placeholder page with no visible text, title, business description, navigation, forms, or stated commercial purpose. Its apparent operating model therefore cannot be established from the rendered site, while the available security and reputation signals indicate that it should not be treated as a trusted service endpoint.

Scam/Impersonation Risk

The site presents a critical interaction risk. External reputation checks recorded a confirmed blacklist status, two malicious detections, three suspicious detections, and a Tier-1 security-vendor detection. These findings are the principal contradiction and outweigh the otherwise limited evidence of stable technical delivery. The homepage was also captured as an empty or unreachable placeholder, providing no identifiable operator, service explanation, or legitimate use context. No separate brand-impersonation or conflicting legal-identity finding is present, but the confirmed blacklist and malicious detections are sufficient to support a strongly cautionary assessment.

EVIDENCE

- The homepage rendered as “Empty / Blank,” with no DOM text, page title, visible links, forms, or stated business purpose.
- External reputation telemetry recorded `external\_blacklist: true`, two malicious detections, three suspicious detections, and one Tier-1 flagged vendor.
- The domain was registered in 2026 and is approximately 0.02 years old; the historical record spans 2026-09-19 to 2026-09-19, with 1 archive snapshot across 1 tracked year.

Regulatory Verification Notes

No operator identity, licensing statement, registration number, regulated-entity disclosure, terms, or other legal information is visible in the available site content. This is a material verification gap rather than independent proof of fraud, but it prevents the site from demonstrating who operates it or what lawful service, if any, it provides. The available broker-context check produced no match; that result is limited reputational context and does not establish licensing or legitimacy. The combination of an empty site, unverified operator identity, and confirmed external threat detections means regulatory or corporate reliance is not supportable on the supplied evidence.

EVIDENCE

- The available homepage capture contains no legal, identity, licensing, or corporate disclosure.
- The domain registrar is NICENIC INTERNATIONAL GROUP CO., LIMITED.
- The site is served through AS214351, identified as FEMOIT - FEMO IT SOLUTIONS LIMITED, GB.
- The transport certificate is DV, issued by YR1, and valid to 2026-12-17.

What to Verify Next

Before any interaction involving credentials, payment information, account creation, downloads, or financial instructions, an organization should independently establish the operator's legal identity and confirm any claimed authorization with the relevant official registry. The domain should also be checked through the organization's established threat-intelligence and web-filtering controls, and any contact or payment channel should be validated through an independently sourced route rather than through the site itself.

EVIDENCE

- The homepage provides no identity or licensing material against which an operator or authorization could be validated.
- The current page state is blank, so no service terms, refund conditions, privacy statement, or responsible-party details are available for review.
- The external reputation record contains confirmed blacklist and malicious-detection findings requiring security-control review before access is permitted.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The available evidence does not support treating the website as an established, legitimate service, and the external threat findings create a material basis

for blocking or escalating the domain within enterprise security processes.

Infrastructure Integrity

The site resolves directly to one identified hosting address rather than through a detected CDN or WAF, with no edge-IP layer observed. Its infrastructure is hosted by FEMOIT - FEMO IT SOLUTIONS LIMITED, GB, on AS214351, registered in the AFRINIC region and associated with Seychelles in the supplied telemetry. The valid DV certificate confirms encrypted transport only; it does not establish operator legitimacy or offset the reputation risk.

Closing Assessment

Enterprise users should block or isolate the domain pending independent confirmation of its operator, purpose, and security status; sensitive interaction should not proceed on the basis of the current evidence.

Written analysis generated 2026-09-28 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rabbids.cc.

- The request stayed on rabbids.cc. It was not redirected to another domain. [CLEAR](#)
- Registration is published under NICENIC INTERNATIONAL GROUP CO., LIMITED. [CLEAR](#)

- DNS for this domain is served by he.net, across 5 name servers. NOTED
- The registration is paid up to 2027-09-18. NOTED
- The earliest public archive of this site is from 2026-09-19. CLEAR
- It is hosted on FEMOIT, from a server in SC. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rabbids.cc at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
