Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is an established Australian banking website presenting Rabobank's rural and agribusiness finance, corporate banking, savings and term-deposit products, agricultural knowledge, community initiatives, careers, and secure online-banking services.

Scam/Impersonation Risk

No contradictions were observed between the site's identity, content, technical behavior, and historical presence. The homepage contains a coherent banking proposition and security guidance addressing impersonation attempts, while testing found no brand-impersonation indicators, hidden forms, suspicious scripts, wallet activity, or unauthorized external submissions. Historical records show continuity rather than suspicious repurposing.

- The homepage identifies Rabobank Australia and presents consistent banking, finance, savings, agricultural, and security content.
- The site's behavioral testing recorded no hidden forms, external submissions, wallet activity, clipboard manipulation, or cloaking.
- The domain was established in 2000 and is approximately 26.4 years old; archival records contain 754 snapshots spanning 2000–2026 across 27 tracked years.

Regulatory Verification Notes

The site presents a defined financial-services model covering rural loans, farm finance, savings accounts, term deposits, corporate banking, and financial risk management. Technical identity evidence associates the service with Cooperatieve Rabobank U.A., while MarkMonitor Corporate Services Inc. is identified as registrar. The available page evidence does not establish a specific regulatory licence number, so licensing remains a transparency item for independent confirmation rather than an identity contradiction. No adverse broker association was identified.

- The site's TLS certificate identifies Cooperatieve Rabobank U.A.; the certificate is EV-validated, issued by Sectigo Public Server Authentication CA EV E36, and valid through 2026-09-30.
- The domain registrar is MarkMonitor Corporate Services Inc.
- The site is served from AS20940, identified as AKAMAI-ASN1 – Akamai International B.V., NL.

What to Verify Next

Before regulated or high-value activity, the relevant Australian licensing and registration details should be confirmed through the applicable official registry. Product terms, fees, eligibility requirements, and application disclosures should be reviewed on the relevant site pages, and official contact channels should be confirmed independently through established Rabobank materials.

- Legal and regulatory pages should be checked for current licence, registration, and responsible-entity details.

- Product disclosure pages should be reviewed before applications, deposits, lending, or other account actions.
- The security guidance page provides the site’s stated process for handling suspected impersonation or fraudulent contact.

Summary Verdict

The evidence supports a high-confidence legitimate and established posture. Durable identity, sustained historical presence, clean external reputation, coherent banking content, and sound technical controls converge without observed contradiction.

Infrastructure Integrity

The website is protected by Akamai CDN/WAF infrastructure, with observed addresses functioning as CDN edge servers and no origin candidate exposed in this analysis. This reduces direct origin exposure and is a mitigating control, although protective hosting infrastructure alone is not proof of legitimacy.

Closing Assessment

Normal interaction, including account login and standard account actions, is appropriate; regulated or high-value activity should follow the site’s published security and disclosure procedures.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rabobank.com.au.

- The request stayed on rabobank.com.au. It was not redirected to another domain. CLEAR
- Registration is published under MarkMonitor Corporate Services Inc. CLEAR
- DNS for this domain is served by akam.net, across 6 name servers. NOTED
- The earliest public archive of this site is from 2000-03-10. CLEAR
- It is hosted on AKAMAI-ASN1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rabobank.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
