Full analysis

Overview

The website is Rabobank Brasil's corporate banking homepage, presenting agribusiness banking, rural and wholesale services, financing, sustainability initiatives, financial information, public offerings, customer support, news, and fraud-awareness content for business and institutional visitors.

Scam/Impersonation Risk

No phishing, brand-impersonation, blacklist, malicious-content, or deceptive interaction indicators were identified. The homepage presents a coherent Rabobank Brasil identity and business model, while its fraud-awareness content is consistent with an established institution. The domain's long registration history further supports continuity of identity rather than a newly created impersonation.

- The homepage identifies Rabobank Brasil and presents agribusiness banking, financing, support, financial information, and public offerings.
- No login form, sensitive form, hidden form, wallet-connect behavior, suspicious scripts, or external posting activity was observed on the homepage.
- The domain was registered on 2001-11-23 and is approximately 24.71 years old.

Regulatory Verification Notes

The site provides corporate, financial-information, public-offering, organizational, and customer-support areas. No license number or specific regulatory registration was supplied in the analyzed page content, which is a limited disclosure gap requiring contextual verification rather than an indication of impersonation. The domain is registered to BANCO RABOBANK INTERNATIONAL BRASIL SA, and the transport certificate identifies Cooperatieve Rabobank U.A.; these identity signals are consistent with the site's institutional presentation.

- The homepage navigation includes "Quem Somos," "Organização," "Informações financeiras," "Ofertas públicas," and "Nosso Suporte."
- Hosted on AS20940 (AKAMAI-ASN1 - Akamai International B.V., NL).
- TLS certificate issued by Sectigo Public Server Authentication CA EV E36, with EV validation, subject organization Cooperatieve Rabobank U.A., valid to 2027-01-08.

What to Verify Next

For any regulated financial engagement, the applicable Brazilian licensing or registration status should be confirmed through the relevant official registry, using the legal entity and service described in the applicable institutional documentation. Customer-service and ombudsman channels should also be validated through an independently sourced Rabobank contact route before consequential transactions.

- The homepage directs visitors to customer support and ombudsman channels.

- The site presents financial information and public-offering materials as dedicated institutional content areas.

Summary Verdict

The website presents as a legitimate, established, and trustworthy corporate banking entity with a coherent institutional identity and no observed contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is protected by Akamai CDN/WAF infrastructure, with observed traffic terminating on Akamai edge servers and no origin candidate identified. This provides a meaningful defensive layer against direct origin exposure, but remains a mitigating infrastructure signal rather than proof of legitimacy.

Closing Assessment

Standard use is appropriate; regulatory and contact-channel checks should be completed where a specific financial product or consequential transaction requires formal confirmation.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rabobank.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
