Full analysis

Overview

Rabobank's corporate website presents a cooperative banking group offering business banking, wholesale and rural finance, asset management, investor services, sustainability initiatives, research, support, and secure login access for its customers and stakeholders.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, blacklist, malicious-content, or deceptive-behavior indicators. The homepage consistently presents the Rabobank identity, provides substantial corporate and service information, and does not directly solicit deposits or sensitive information.

- The homepage identifies Rabobank as a cooperative banking group and provides coherent corporate, support, investor, and organizational content.
- External reputation checks recorded zero malicious results, zero suspicious results, and no blacklist match.
- The domain was registered on 1996-11-21 and is approximately 29.72 years old.

Regulatory Verification Notes

The site provides substantial organizational and operational information, including "About us," "Organization," "Rules and Regulations," investor relations, support, and financial-crime information. A third-party broker dataset associates the domain with Rabobank but reports "No Regulation" and no license found; this is contextual intelligence rather than a legal or licensing determination. Formal authorization and applicable banking permissions should therefore be confirmed through the relevant competent registry for any regulated-service decision.

- The homepage is classified as a corporate banking site and describes Rabobank's cooperative mission, global operations, sustainability, research, and investor relations.
- The third-party broker record matches the domain exactly and reports "No Regulation" with no license found, while expressly functioning only as contextual information.
- The site is served from AS20940 (AKAMAI-ASN1 - Akamai International B.V., NL).
- TLS uses an EV certificate issued by Sectigo Public Server Authentication CA EV E36 for Cooperatieve Rabobank U.A., valid to 2027-02-20.

What to Verify Next

For regulated engagements, confirm the applicable banking authorization and legal entity in the relevant official registry, and validate contact or support channels through an independently obtained corporate source. Standard institutional onboarding, beneficiary verification, and transaction controls should remain in place for material financial activity.

- The site exposes dedicated About us, Organization, Rules and Regulations, Support, Contact, and Investor Relations sections.
- The homepage provides a formal corporate description and organizational navigation suitable for independent entity cross-checking.
- The site includes financial-crime and related compliance information within its support and corporate content.

Summary Verdict

The website presents a high-confidence established and legitimate trust posture. The evidence supports normal interaction, including account login and standard use, with no contradiction-based scam or impersonation concerns identified.

Infrastructure Integrity

The website is protected by Akamai CDN/WAF infrastructure. Observed addresses were CDN edge servers, and the origin server was not observable in this analysis; this reduces direct exposure but is a mitigating control rather than proof of legitimacy.

Closing Assessment

Normal interaction and standard account use are appropriate. Material financial decisions should continue to follow ordinary independent onboarding, authorization, and transaction-control procedures.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rabobank.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
