

Is rac.co.uk safe? TrustSniffer's moderate-trust assessment: 65/100

rac.co.uk

Verdict

65

OUT OF 100

MODERATE TRUST

rac.co.uk is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Safe for Read-Only

Dynamic Interaction Caution

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-style marketing and product pages for RAC motoring services: breakdown cover, insurance, servicing and related offers. Includes regulatory and company registration details and calls-to-action to get quotes or download apps.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Safe for Read-Only.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

RAC is a commercial UK motoring-services website presenting breakdown cover, car insurance, vehicle servicing and repairs, route planning, car-buying information, retail products, and related mobile applications. Its apparent business model combines membership fees, insurance premiums, service bookings, and retail sales.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, confirmed blacklist, malicious detection, or conflicting legal identity. The site's content is coherent with the RAC motoring-services proposition, and technical interaction testing found no hidden forms, wallet activity, cloaking, or other abuse mechanisms. One abuse report was associated with a shared content-delivery IP, but it had zero confidence and was explicitly attributed to shared provider infrastructure rather than to this website; it therefore does not constitute evidence of site-specific abuse. The overall concern is consequently limited to the unresolved independent verification of the operator, not an observed impersonation pattern.

EVIDENCE

- The homepage presents a consistent commercial motoring-services model and was assessed with no page-level red flags.
- Interactive testing recorded no hidden forms, password submissions to external destinations, wallet connections, clipboard activity, or cloaking.
- Shared CDN IP 8.47.69.0 had 1 abuse report with confidence score 0; the attribution was shared infrastructure, not the website itself.

Regulatory Verification Notes

The site presents corporate and regulatory information within its company-related content, which supports a professional commercial presentation. However, the available evidence does not independently verify the real-world operator identity or establish a confirmed licence number and regulator relationship for the relevant services. This is a verification and disclosure matter rather than evidence of a scam. The independent broker-reputation dataset contained no matching record, while the site's moderate trust posture remains appropriate because identity verification is incomplete.

EVIDENCE

- The site's company-information content includes corporate registration and regulatory statements.
- The site's transport security is provided by a DV certificate issued by GlobalSign GCC R3 DV TLS CA 2020, valid to 2027-04-12T14:57:16+00:00.
- The site is served from AS13335, Cloudflare, Inc., US.

What to Verify Next

Before high-value payments, policy commitments, or submission of sensitive information, the stated corporate entity should be matched independently against the applicable company register and any relevant insurance or financial-services regulator. The contact details used for account, quotation, cancellation, and claims matters should be confirmed through an independently sourced RAC channel, and payment should use a method providing appropriate transaction and chargeback protections. Terms, exclusions, renewal conditions, and cancellation arrangements should also be reviewed before commitment.

EVIDENCE

- The homepage provides quotation and account-login calls to action, making independent confirmation of the official service channel material before sensitive interaction.
- Company and regulatory details are available on the site and can be compared with authoritative register entries.
- The commercial pages contain promotional pricing and offer conditions, supporting a review of the associated terms before purchase.

Summary Verdict

The website has a **moderate, evidence-consistent trust posture** with no observed scam or impersonation indicators. Its coherent corporate content and clean technical presentation support ordinary assessment as an established-looking service website, while the absence of independently verified operator identity prevents a fully conclusive legitimacy determination.

Infrastructure Integrity

The site is protected by a Cloudflare CDN and WAF, with observed CDN edge infrastructure and potential origin candidates. This architecture helps reduce direct origin exposure and is a mitigating security control, but infrastructure protection alone does not establish the operator's identity or regulatory standing.

Closing Assessment

Normal browsing is proportionate, but independent entity and service-term checks should precede high-value or sensitive actions.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by behaviour in a sandbox.

01 Dynamic Interaction Caution

- The page sent data to a destination TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 8.47.69.0 (Cloudflare, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rac.co.uk.

- The request stayed on rac.co.uk. It was not redirected to another domain. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rac.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
