Full analysis

Overview

Racha Cuca is a Portuguese-language entertainment and educational portal presenting online puzzles, logic problems, word games, quizzes, daily games, and study resources, with an apparent ad- and content-supported model that may also include newsletter and premium-service offerings.

Scam/Impersonation Risk

No contradictions were observed: the reviewed homepage presents a coherent games-and-education service, with no financial solicitation, credential-harvesting form, phishing indicator, or suspected brand impersonation. Dynamic testing recorded hidden forms and external activity, but no password-bearing external forms, wallet activity, cloaking, or suspicious inline scripts; these observations are therefore better treated as minor implementation signals than as evidence of impersonation. The site's long-running, continuous historical presence is also consistent with an established service rather than a recently created deceptive operation.

EVIDENCE

- The homepage identifies the service as “Racha Cuca” and provides puzzles, logic problems, quizzes, word games, education content, and daily games.
- Dynamic testing completed 2 successful runs and recorded 2 hidden forms, 0 external password forms, 0 wallet-connect runs, 0 wallet-drainer runs, and 0 cloaking detections.
- The domain was registered in 2006 and is approximately 20.33 years old.
- The web archive contains 843 snapshots spanning 2006–2026, covering 21 tracked years with a maximum observed gap of 1 year.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate informational portal, but the real-world operator identity is not independently verified. Registration records name HEX SERVICOS DE INFORMATICA LTDA.ME; that registration attribution should not be treated as independent proof that the operating entity and the website are the same. The reviewed content does not present a regulated financial service or a license claim, so licensing is not applicable to the apparent core business model; any premium-service or promotional activity would warrant separate review of its terms and commercial disclosures. External reputation signals were clean, and no matching broker-related reputational record was identified.

EVIDENCE

- Registration records list HEX SERVICOS DE INFORMATICA LTDA.ME and an expiration date of 2036-04-19.
- The site is served from AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- The site's TLS certificate is issued by WE1 at DV validation level and is valid through 2026-09-17.
- The homepage contains one newsletter-subscription form and no login form or sensitive payment form.

What to Verify Next

Before any credential or payment interaction, independently confirm that the legal entity named in the relevant site terms, privacy notice, and commercial disclosures matches the intended operator. For any premium subscription or promotion, review cancellation, refund, renewal, privacy, and payment-protection terms; confirm official support channels through an independent route rather than relying solely on contact details presented on the site.

EVIDENCE

- The apparent business model is free entertainment and educational content with possible newsletter and premium-service components.
- The identity-verification status remains unverified despite the registration attribution.
- The reviewed page content does not identify a financial regulator, license authority, or license number.
- The page contains no sensitive form requesting passwords or payment credentials.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence converging on an established, apparently legitimate website and no observed scam or impersonation contradiction. The principal residual uncertainty concerns independent attribution of the real-world operator, not evidence of malicious intent or deceptive behavior.

Infrastructure Integrity

Cloudflare CDN and WAF protection are in place, and all observed addresses were Cloudflare edge infrastructure; no origin server address was identified in the analysis. This reduces direct exposure of the hosting origin and is a mitigating infrastructure characteristic, but it is not proof of legitimacy.

Closing Assessment

Normal browsing is proportionate to the assessed posture; ordinary independent merchant-identity, commercial-terms, and payment-protection checks should precede any submission of credentials or payment information.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rachacuca.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
