## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

RackStore is a Moscow-based data-center and IT infrastructure services website presenting server colocation, dedicated and virtual servers, cloud hosting, business software, security, backup, monitoring, and technical support. Its apparent business model is recurring rental and service revenue for enterprise hosting and managed IT solutions, supported by pricing, customer contacts, account access, and service descriptions.

### Scam/Impersonation Risk

No contradictions were observed. The site's business presentation is coherent with a corporate infrastructure provider, and the supplied reputation checks found no malicious, phishing, impersonation, or blacklist indicators. Its login and registration functionality is consistent with an account-based service model, while observed browser behavior showed no suspicious external activity, hidden forms, wallet interaction, or deceptive redirection.

- The homepage presents RackStore as a Moscow data-center provider with coherent service descriptions, pricing, contact options, and corporate testimonials.
- The domain was registered on 2011-07-08 and is approximately 15.08 years old.
- Historical records contain 143 snapshots spanning 2012-02-17 through 2025-10-15, covering 14 tracked years.

### Regulatory Verification Notes

The website presents legal-entity information, licenses, and ISO certifications alongside its commercial services. Its offerings include server placement, dedicated and virtual server rental, VDS hosting, cloud IaaS, domains, SSL certificates, DDoS protection, backup, monitoring, Microsoft and ISP licensing, and technical administration. The supplied evidence does not independently establish a third-party regulated status or provide a verified regulatory license number; this is a verification consideration rather than an identity contradiction.

- The homepage and company-information pages present legal details, licensing references, and ISO certification claims.
- The site is served through hosting provider RU-VARITIPLS-20160825 on AS60922 (AS\_KKM\_IT - Variti+ LLC, RU).
- TLS uses GlobalSign GCC R6 AlphaSSL CA 2025, DV validation, and is valid until 2026-12-18 19:28:39 UTC.

### What to Verify Next

For regulated procurement or material commitments, confirm any claimed licenses and certifications with the relevant issuing bodies, and validate the contracting entity against the legal information presented on the site. Contact channels should also be confirmed through an independently sourced business record before formal vendor onboarding.

- The legal and company-information pages provide the stated entity details and certification references.
- The contact page provides the business telephone and service-contact channels used for verification.

### Summary Verdict

RackStore presents a high-confidence established-entity posture with no observed scam, impersonation, or phishing contradictions. Normal interaction, including account login and standard service use, is appropriate.

### Infrastructure Integrity

The site resolves to a single likely origin address hosted by Variti+ LLC in Russia; no CDN, WAF vendor, or edge-IP layer is identified. This is a straightforward hosting configuration and does not undermine the site's established identity.

### Closing Assessment

Prospective customers may proceed with normal service evaluation and account use, applying standard vendor due diligence for regulated or high-value engagements.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

### What the analysis found

No rule findings contributed to this verdict.

### Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

### What TrustSniffer observed

First-party facts recorded during the assessment of rackstore.ru.

- The request stayed on rackstore.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGTIME-RU. CLEAR
- DNS for this domain is served by 132.10, across 2 name servers. NOTED
- The registration is paid up to 2027-07-08. NOTED
- The earliest public archive of this site is from 2012-02-17. CLEAR

- It is hosted on AS\_KKM\_IT, from a server in RU. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about rackstore.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
