

Is radio-en-vivo.mx legit? TrustSniffer's high-trust assessment: 85/100

radio-en-vivo.mx

Verdict

85

OUT OF 100

HIGH TRUST

radio-en-vivo.mx appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

A Spanish-language directory aggregating live Mexican radio stations and podcasts, offering search by genre and region, user account registration, and links to mobile apps; includes a privacy/consent dialog.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

radio-en-vivo.mx is a Spanish-language online directory for live Mexican radio stations and podcasts, presenting search and discovery by genre and region, user accounts, and links to mobile applications. Its apparent business model is ad-supported media aggregation, potentially supplemented by app referrals and partner links.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other contradictory signals were observed. The homepage presents a coherent informational media-directory purpose rather than a deceptive financial or investment proposition, and the available reputation checks were clean. The combination of sustained historical continuity, ordinary media content, and the absence of detected malicious indicators supports an apparently legitimate, low-risk assessment; however, the operator's real-world identity is not independently verified.

EVIDENCE

- The homepage is identified as a directory and streaming page for Mexican radio stations and podcasts, with no detected red-flag content or brand-impersonation indicators.
- The domain was registered on 2018-06-12 and is approximately 8.17 years old.
- Web-archive records contain 636 snapshots spanning 2018–2026, with 9 years tracked and no suspicious repurposing identified.
- External reputation checks found no malicious or suspicious detections and no blacklist hit.

Regulatory Verification Notes

The site appears consistent with an established media service, but the available evidence does not independently connect it to a specific legal operator. No licensing claim, licensing authority, or registration number is evidenced in the reviewed site content; for this apparent media-directory model, that is a transparency and identity-verification point rather than evidence of a scam. The site's privacy interface describes advertising and analytics processing, including data handling by numerous partners, which is relevant to privacy review before account creation. Registration through GoDaddy.com and valid transport encryption provide supporting infrastructure evidence, but neither establishes the operator's legal identity.

EVIDENCE

- The site is registered through GoDaddy.com; the recorded domain expiration date is 2027-06-12.
- The site is served from AS16276 (OVH - OVH SAS, FR).
- The TLS certificate uses DV validation, was issued by YE1, and is valid to 2026-10-22T20:26:16+00:00.
- The homepage displays a privacy and consent interface describing cookies, advertising, analytics, location data, and processing by 1,733 partners.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the entity responsible for the service, the applicable privacy contact, and any relevant consumer terms. Account users should review the login, registration, and password-reset flows and avoid reusing passwords from other services. The publisher and permissions of any associated mobile application should be checked through an official application-distribution listing, and payment activity—if offered through a partner—should be covered by a recognized payment-protection mechanism. The official support and contact channels should also be confirmed through an independent route.

EVIDENCE

- The homepage provides login, registration, and password-reset forms, with no sensitive payment form detected.
- The site links visitors to mobile application distribution or referral options.
- The privacy dialog permits consent refusal or preference changes and states that preferences are retained for 13 months.
- The reviewed page contains advertising and analytics elements, making privacy and consent settings relevant to account use.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. This classification supports normal informational use and routine site interaction, while the absence of independent operator verification means that trust in the website should not be treated as proof of a particular real-world entity.

Infrastructure Integrity

The website is protected by a CDN/WAF arrangement, and the observed addresses are CDN edge addresses rather than identifiable origin candidates. This reduces direct exposure of the origin environment and is a mitigating infrastructure control, not independent proof of legitimacy.

Closing Assessment

Ordinary browsing and media use are proportionate to the assessed posture; before submitting credentials or making any payment, independent identity, terms, and payment-protection checks should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of radio-en-vivo.mx.

- The request stayed on radio-en-vivo.mx. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-12. NOTED
- The earliest public archive of this site is from 2018-07-22. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about radio-en-vivo.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
