

Is radio.co.ma legit? TrustSniffer's high-trust assessment: 80/100

radio.co.ma

Verdict

80

OUT OF 100

HIGH TRUST

radio.co.ma appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

A French-language directory and streaming portal listing Moroccan FM/AM and web radio stations (Radio.co.ma). The page is informational and ad-supported, with an explicit cookie/consent management system listing many ad vendors. No login, payment requests, or credential-harvesting elements are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This French-language website is an informational Moroccan radio directory and streaming portal that aggregates FM, AM, and web-radio stations, organizes them by genre and region, and presents free listening supported by advertising and data-driven consent management.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent media-directory purpose, lists named Moroccan stations, and contains no login form, payment request, credential-collection flow, cryptocurrency feature, or detected brand-impersonation element. Behavioural inspection identified hidden form activity and extensive external requests, but the page-level evidence attributes the visible interaction to cookie-consent and advertising mechanisms rather than sensitive-data collection. The overall evidence is therefore consistent with an established, apparently legitimate informational site, while its real-world operator remains independently unverified. Evidence:

- The homepage describes free Moroccan radio streaming and lists stations including Medi 1, Hit Radio, Radio Mars, Aswat, and Chada FM; no login or sensitive form is present.
- The domain age is 13.336071184120465 years, with the registration record dated 2015-08-04T12:13:04Z.
- The site has 964 archive snapshots spanning 2013-04-09T19:35:15Z to 2026-07-25T21:08:33Z across 14 tracked years.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, no phishing search hit, and no blacklist hit.

Regulatory Verification Notes

The site operates as an informational media portal rather than presenting a regulated financial or trading service. Its footer provides links labelled About, Contact, Privacy Rules, and DMCA, and identifies "InstantAudio" as the copyright holder; these disclosures support a recognizable operating context but do not independently verify the legal entity behind the service. No licensing authority or licence number is claimed in the supplied site material. That is a transparency item for ordinary business verification, not evidence of scam activity. The advertising model should also be assessed against applicable privacy and consent requirements because the site identifies numerous advertising partners and uses consent management. Evidence:

- The homepage footer displays About, Contact, Privacy Rules, DMCA, and "© 2026 InstantAudio. Tous les droits sont réservés."

- The homepage's consent-management interface identifies many advertising vendors and data-driven advertising partners.
- The site is hosted on AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- Its TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-10-30T06:27:28+00:00.

What to Verify Next

Before any credential or payment interaction, an interested party should independently confirm the operator associated with the InstantAudio reference, review the site's privacy and consent terms, and confirm that the listed contact route is authoritative through an independent channel. If a commercial relationship, station submission, or advertising arrangement is contemplated, the relevant legal entity, contractual terms, and applicable media or privacy obligations should be checked through appropriate registries or counterparties.

EVIDENCE

- The homepage links to About, Contact, Privacy Rules, and DMCA pages that can be reviewed for operator and data-handling details.
- The site presents an "Inclure votre radio" function, making independent confirmation of submission and partnership terms relevant before entering a business arrangement.
- The consent banner identifies extensive advertising participation, making review of consent choices and privacy disclosures a relevant next step.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated informational purpose. The classification does not independently prove the real-world operator's identity, so ordinary merchant-identity, privacy, and payment-protection checks remain appropriate before sensitive interactions.

Infrastructure Integrity

The website is delivered through Cloudflare's CDN and WAF, with observed addresses belonging to Cloudflare edge infrastructure rather than a directly exposed origin. This is a mitigating security measure that reduces direct origin exposure, but it is infrastructure protection rather than proof of operator legitimacy.

EVIDENCE

- The hosting infrastructure resolved through Cloudflare CDN/WAF edge addresses, including 104.21.65.39 and 172.67.158.5 on AS13335.

Closing Assessment

The site is suitable for ordinary browsing and radio-streaming use; any account, commercial, or payment-related engagement should proceed only after the operator and transaction protections have been independently confirmed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of radio.co.ma.

- The request stayed on radio.co.ma. It was not redirected to another domain. CLEAR
- Registration is published under GENIOUS COMMUNICATIONS. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-04. NOTED
- The earliest public archive of this site is from 2013-04-09. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about radio.co.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
