

Is radios.com.pe legit? TrustSniffer's high-trust assessment: 90/100

radios.com.pe

Verdict

90

OUT OF 100

HIGH TRUST

radios.com.pe appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

A Spanish-language Peruvian radio directory listing stations by genre and region. Uses a consent management platform that lists many ad/analytics vendors. Primary purpose is content discovery and ad monetization.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Spanish-language Peruvian online radio directory that presents live stations organized by genre and region, allowing visitors to discover and listen to internet radio streams. Its apparent business model is content aggregation supported by third-party advertising, analytics, and consent-based personalization.

Scam/Impersonation Risk

No contradictions were observed across the supplied page, reputation, historical, and behavioral evidence. The homepage presents a coherent media-directory function, with no login form, password collection, wallet connection, payment flow, brand-impersonation indicators, or malicious content identified. Behavioral testing did record hidden form elements and extensive third-party network activity, but the observed form was a consent-banner mechanism and no password, wallet, or other sensitive form activity was detected; this is consistent with the disclosed advertising and consent-management model rather than an impersonation pattern. External reputation checks found no malicious or suspicious detections, no phishing indication, and no abuse reports associated with the observed delivery infrastructure.

EVIDENCE

- The homepage identifies live Peruvian radio stations, genres, regions, and streaming functions; page analysis recorded no red flags.
- Domain age: 18.379192334017795 years (approximately 18.38 years), based on registration continuity.
- Web-archive coverage: 1,141 snapshots from 2008-03-24T23:46:49Z through 2026-05-14T20:13:20Z, spanning 19 years with a maximum gap of 1 year.
- Behavioral testing completed 2 successful runs and detected 2 hidden forms across both runs, with 0 password-external forms, 0 wallet-connect runs, and 0 wallet-drainer runs.

Regulatory Verification Notes

The site functions as an informational radio directory rather than a financial, brokerage, or transactional service. It provides About, Contact, privacy-policy, and DMCA routes, but the supplied page evidence does not independently verify a real-world operating entity or establish any licensing status. No licensing claim or license number is presented in the available business-model evidence; for this type of media directory, that is a transparency item for confirmation rather than evidence of deceptive conduct. The domain is registered through 101domain GRS Ltd., while the available evidence remains insufficient to treat the named registrant or on-site identity information as independently verified.

EVIDENCE

- Hosting telemetry: served from AS13335, Cloudflare, Inc. (CLOUDFLARENET), US.
- TLS telemetry: certificate issued by WE1 at DV validation level, valid to 2026-11-08T00:48:28+00:00.
- The site exposes `/acerca`, `/contactenos`, `/politica-de-privacidad`, and `/dmca` routes from the directory interface.
- The registrar is 101domain GRS Ltd.

What to Verify Next

Before any future credential or payment interaction, independently confirm the operator details through the site's About and Contact pages and assess whether the stated privacy and DMCA disclosures identify a responsible entity. If the service introduces paid features, confirm applicable merchant terms, cancellation or return arrangements, and available payment protections through an independent route rather than relying solely on site-presented claims.

EVIDENCE

- The About page is available for review of operator and business disclosures.
- The Contact page provides the site's stated communication route for independent channel confirmation.
- The privacy-policy and DMCA pages are available for review of data-handling and rights-management disclosures.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated informational purpose. The operator's real-world identity is not independently verified, so legitimacy should be described as apparent rather than proven.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge servers rather than identified origin candidates. This reduces direct origin exposure and is a mitigating infrastructure signal, but it is not by itself proof of operator legitimacy.

EVIDENCE

- Observed edge address: 104.21.2.187; all 4 observed IP addresses were identified as CDN edge infrastructure, with 0 likely origin candidates.
- Cloudflare was the only detected CDN provider, with the hosting country recorded as US.

Closing Assessment

Ordinary browsing and stream discovery are proportionate to the assessed posture; any later request for credentials or payment should be preceded by independent checks of the responsible entity, applicable terms, and payment safeguards.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of radios.com.pe.

- The request stayed on radios.com.pe. It was not redirected to another domain. CLEAR
- Registration is published under 101domain GRS Ltd.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The earliest public archive of this site is from 2008-03-24. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about radios.com.pe at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
