

Is radiosouvenirs.be a scam? TrustSniffer's high-risk assessment: 0/100

radiosouvenirs.be

Verdict

0

OUT OF 100

CRITICAL RISK

radiosouvenirs.be shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Bare directory index showing a cgi-bin/ entry and timestamps. No forms, no commerce, no content beyond file listing.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

What radiosouvenirs.be served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a minimal directory-index page presenting a file listing rather than a developed commercial, informational, or transactional service. Its apparent purpose cannot be established from the available homepage content, which consists only of a basic directory view.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk** because external security intelligence records malicious detections and confirmed blacklist placement. This is materially more significant than the benign appearance of the homepage: the page contains no login form, payment workflow, or obvious malicious script activity, but the absence of visible interaction mechanisms does not resolve the external reputation contradiction. No page-level brand impersonation or identity contradiction was observed, and the available content does not establish a legitimate operating entity. Historical records indicate sustained domain presence, but that provenance does not offset the current external detections.

EVIDENCE

- External security evaluation recorded 15 malicious detections and 1 suspicious detection among 21 effective evaluations; three major security providers contributed threat detections.
- The domain is recorded as blacklisted by two external sources.
- Archive records show 72 snapshots spanning 2015–2025, with the first recorded on 2015-10-11 and the last on 2025-09-08.
- Historical provenance reconciles the domain to an age of 10.858316221765914 years, while the current registration record reports creation on 2026-04-14; this registration-history discrepancy remains unresolved by the supplied evidence.

Regulatory Verification Notes

The homepage provides no identifiable business description, legal-entity disclosure, licensing claim, registration number, or regulatory authority information. This is a verification gap rather than independent proof of unlawful conduct, but it leaves the operator and any regulated purpose unverified. The absence of a match in the available broker-reputation dataset does not constitute licensing or regulatory confirmation. The technical transport layer is valid, but ordinary TLS protection does not authenticate the operator or establish regulatory standing.

EVIDENCE

- The homepage is titled “Index of /” and contains only a directory listing with a `cgi-bin/` entry; no legal, licensing, or business disclosure is present.
- The hosting infrastructure is identified as AS61236, MEDIACTIVE-NETWORK – MEDIACTIVE SAS, France.
- The site's TLS certificate uses issuer YR1, validation level DV, and is valid to 2026-09-22T02:34:36+00:00.
- The available broker-reputation dataset reports no match.

What to Verify Next

Before any interaction beyond passive viewing, an independent party should confirm whether the domain is expected to host the claimed material and identify the responsible legal entity through an authoritative offline or registry-based channel. Any licensing or registration assertion relevant to the intended use should be checked directly with the applicable regulator, and contact channels should be confirmed independently rather than relying solely on information presented by the site. Until those checks are completed, login, credential submission, downloads, and financial activity should not proceed.

EVIDENCE

- The homepage supplies no business model, operator identity, licensing statement, or transaction purpose against which an independent verification could be matched.
- The only visible internal navigation is the root directory and the `cgi-bin/` entry, providing no established customer-support or corporate-verification path.
- Automated behavioral testing observed no forms, external requests, wallet activity, or sensitive interaction surface; this supports limiting activity to passive inspection rather than treating the site as an approved service.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The available evidence does not independently verify the operator, and the confirmed external reputation contradiction dominates the otherwise minimal and technically ordinary presentation.

Infrastructure Integrity

The site resolves directly to infrastructure operated by MEDIACTIVE-NETWORK – MEDIACTIVE SAS in France, with no CDN or WAF identified and a single apparent origin address. The valid DV certificate provides transport confidentiality only; it is a mitigating technical control, not evidence of legitimacy.

Closing Assessment

The appropriate enterprise posture is to restrict activity to passive observation while preserving and escalating any relevant security evidence for independent investigation; credentials, downloads, and financial transactions should remain out of scope unless the operator and purpose are verified through trusted channels.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of radiosouvenirs.be.

- The request stayed on radiosouvenirs.be. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2015-10-11. CLEAR
- It is hosted on MEDIACTIVE-NETWORK, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about radiosouvenirs.be at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
