

Is rain.co.za legit? TrustSniffer's high-trust assessment: 100/100

rain.co.za

Verdict

100

OUT OF 100

HIGH TRUST

rain.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Landing page for Rain (Pty) Ltd offering unlimited 5G mobile and home wifi plans, device (LoopPhone) listings, pricing, and support/contact options. Standard cookie consent present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1999.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a consumer telecommunications storefront presenting unlimited 5G mobile and home Wi-Fi services, LoopPhone devices, pricing, support options, and month-to-month subscription plans for the South African market.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent commercial telecommunications model, identifies a consistent brand across its landing-page content, and shows no indicators of phishing, brand impersonation, malicious code, hidden sensitive forms, wallet-draining behavior, or suspicious credential capture. Its long-established registration continuity and sustained archival presence are consistent with an established website, while external reputation checks returned no malicious or suspicious findings. The available evidence supports a low scam or impersonation concern, although the real-world operator identity remains independently unverified.

EVIDENCE

- Domain registration: 1998-02-19; age 28.5 years; expiration 2027-02-19.
- Web archive: 1,120 snapshots spanning 1999-01-25 to 2026-07-30, covering 28 years.
- Homepage analysis found no phishing indicators, brand-impersonation finding, hidden forms, wallet-connect activity, or sensitive external form submission.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no blacklist or phishing finding.

Regulatory Verification Notes

The footer identifies “rain (Pty) Ltd” and states that Rain is a registered trademark, providing an on-site corporate and brand attribution. This supports apparent legitimacy but does not independently verify the operator's real-world identity. The reviewed content does not present a licensing authority or license number; for a telecommunications provider, that is a regulatory-disclosure gap requiring confirmation through the applicable South African registry. No adverse third-party broker association was identified, but that context is not a licensing or regulatory determination. The site's established registration, recognized registrar, valid transport encryption, and Amazon hosting provide additional infrastructure and continuity support.

EVIDENCE

- Hosting: AS16509, AMAZON-02 - Amazon.com, Inc., US.
- TLS certificate: Certum DV TLS G2 R39 CA; validation level DV; valid to 2027-01-02 12:39:25 UTC.
- Homepage footer states “rain (Pty) Ltd. All rights reserved.” and identifies Rain as a registered trademark.
- The homepage exposes “legal” and support pathways, but no licensing authority or license number is displayed in the reviewed content.

What to Verify Next

Before credential or payment interactions, independently confirm the applicable telecom authorization and the corporate details associated with Rain (Pty) Ltd through the relevant official registry. Review cancellation, service, device-return, and refund terms on the legal pages, and confirm that the available payment method provides appropriate consumer protection. Contact details should also be confirmed through an independent route, such as an official store or offline customer-service channel, before resolving account or payment issues.

EVIDENCE

- The homepage provides “legal,” “support,” “find a store,” and “request a call” routes that can be used for document and contact-channel review.
- The captured page contained one contact-request form and no sensitive form or login form.
- The site includes a cart and product-browsing workflow, making payment-protection and cancellation-term review relevant before purchase.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk website. The high-trust posture is supported by convergence across coherent page content, long-term domain continuity, clean external reputation findings, and stable technical operation; it should not be treated as independent proof of the real-world operator’s identity.

Infrastructure Integrity

The website is protected by AWS CloudFront CDN/WAF infrastructure. Observed addresses include CDN edge servers and potential origin candidates, so the protective layer mitigates direct exposure and supports operational resilience but is not, by itself, proof of legitimacy.

EVIDENCE

- CloudFront edge IPs observed: 15.197.148.33, 3.33.130.190, 52.85.154.26, and 52.85.154.28.
- Infrastructure resolution identified AWS CloudFront as the detected CDN/WAF provider.
- Hosting infrastructure resolved successfully with 8 unique IPs, including 6 edge IPs and 1 likely origin candidate.

Closing Assessment

Ordinary use is proportionate to the assessed posture, subject to the standard independent merchant-identity, service-term, and payment-protection checks before credentials or payment details are submitted.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rain.co.za.

- The request stayed on rain.co.za. It was not redirected to another domain. CLEAR
- Registration is published under DIAMATRIX C.C.. CLEAR
- DNS for this domain is served by awsdns-17.net, across 4 name servers. NOTED
- The registration is paid up to 2027-02-19. NOTED
- The earliest public archive of this site is from 1999-01-25. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rain.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
