

Is rainberrytv.com legit? TrustSniffer's high-trust assessment: 99/100

rainberrytv.com

Verdict

99

OUT OF 100

HIGH TRUST

rainberrytv.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

A trailers and media site (RainberryTV) listing movie, game and animation trailers. Cookie consent and partner data processing notice present; content appears editorial/curated and monetized through ads.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

RainberryTV is an entertainment and media website presenting curated movie, game, animation, and documentary trailers, with an apparent ad-supported publishing model that also involves partner-based audience data processing.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents ordinary editorial trailer content, including titles such as "Passenger," "The Marked Woman," "Pressure," "Leviticus," and "Fathers," rather than credential harvesting, financial solicitation, or impersonation. The observed site behavior also showed no login form, sensitive form, wallet connection, hidden form, clipboard manipulation, or other abuse pattern. External reputation checks recorded no malicious or suspicious detections, and no relevant broker-reputation match was identified. Overall, the available evidence is consistent with an established, apparently legitimate media website, while the real-world operator remains independently unverified.

EVIDENCE

- Homepage: Identifies “RainberryTV” and displays movie and other entertainment trailers with “Watch Now” prompts; no sensitive submission form was observed.
- Homepage behavior: Two successful observation runs recorded no wallet connection, wallet-sensitive activity, wallet-drainer behavior, hidden forms, password-external forms, cloaking, or clipboard writes.
- External reputation telemetry: 0 malicious detections, 0 suspicious detections, and `gsb\_malicious: false`; traffic rank recorded as 1237.
- Domain registration: Registered 2022-04-22T20:02:00Z through GoDaddy.com, LLC; age 4.32 years.

Regulatory Verification Notes

The observed homepage is consistent with an informational, ad-supported media publisher rather than a financial or other obviously regulated service. Its consent notice explains processing for personalised advertising, content measurement, audience research, precise geolocation, device identification, and storage or access on a device, and states that consent may be withdrawn or objections raised through the site’s privacy controls. The homepage does not state a legal entity or license number; this is a transparency item for independent confirmation, not evidence of a scam. The available evidence supports apparent legitimacy, but it does not independently verify the operator’s real-world identity.

EVIDENCE

- Homepage consent notice: States that the site and 35 partners process personal data and describes consent, withdrawal, and legitimate-interest objection mechanisms.
- Hosting telemetry: Served from AS16509, AMAZON-02 - Amazon.com, Inc., US.
- Transport security: TLS certificate issued by Amazon RSA 2048 M04, validation level DV, valid to 2027-01-31T23:59:59+00:00.
- Homepage business-model evidence: Describes an ad-supported trailer and promotional-content service rather than a service presenting a regulated financial product.

What to Verify Next

Before any credential or payment interaction associated with the site or a linked service, independently confirm the publisher’s legal identity and official contact channels through a separate authoritative source. Review the privacy policy and consent controls to determine which partners receive data and how objections or withdrawal are handled. If a commercial transaction is introduced, confirm the applicable return or refund terms and use payment methods with established protection.

EVIDENCE

- Homepage: Provides the RainberryTV identity and the primary description of the service to use as the reference point for independent identity confirmation.
- Privacy controls: Offer “Learn More” and privacy-policy pathways for reviewing consent and data-processing choices.
- Observed forms: No credential, payment, or other sensitive form was present in the captured homepage.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate website and no observed scam, phishing, impersonation, or blacklist contradiction. The principal qualification is that the operator’s real-world identity is not independently verified, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The website is protected by AWS CloudFront CDN/WAF infrastructure, with observed addresses representing CDN edge servers and no origin candidate identified in the analysis. This reduces direct exposure of the origin and is a mitigating infrastructure characteristic, but it is not, by itself, proof of legitimacy.

Closing Assessment

Normal informational browsing is proportionate; any later credential or payment activity should be preceded by the ordinary independent identity, terms, and payment-protection checks appropriate to that transaction.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rainberrytv.com.

- The request stayed on rainberrytv.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by awsdns-12.org, across 4 name servers. NOTED
- The registration is paid up to 2027-04-22. NOTED
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rainberrytv.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
