

Is rajit.net safe? TrustSniffer's moderate-trust assessment: 60/100

rajit.net

Verdict

60

OUT OF 100

MODERATE TRUST

rajit.net is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Safe for Read-Only

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Corporate website for rajIT Solutions Ltd., an IT services and software development company based in Rajshahi, Bangladesh (since 2005). Contains service listings, client logos, contact details, and product information. No signs of phishing or financial investment schemes.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What rajit.net served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Safe for Read-Only.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is the corporate site of rajIT Solutions Ltd., presenting itself as a Bangladesh-based IT services and software development company established in 2005. It offers website design, custom software, mobile application development, IT support, business process outsourcing, and products such as an Easy Hospital Management System, with commercial activity centred on client contracts, service fees, product sales, and demonstration or quotation requests.

Scam/Impersonation Risk

No phishing, malware, brand-impersonation, financial-investment, cryptocurrency, or credential-harvesting indicators were observed across the homepage, service content, contact areas, and interactive forms. The site's business presentation is internally consistent with a conventional IT-services provider, and no identity contradiction was observed. A reputational signal exists at the shared hosting-IP level: abuse reports concern infrastructure used by the hosting provider rather than being attributed specifically to rajit.net; this is a contextual concern, not evidence that the website itself is malicious. Evidence:

- The homepage identifies rajIT Solutions Ltd. and presents website design, software development, mobile application development, IT support, products, clients, careers, and quotation functions.

- The contact and quotation/demo forms were observed without login fields, password collection, hidden forms, untrusted destinations, or wallet-connection behaviour.
- The hosting-IP record carries 24 abuse reports, attributed to shared WHG Hosting Services Ltd. infrastructure rather than specifically to the website.
- The domain was registered on 2012-02-23 and is approximately 14.5 years old; historical records show 185 snapshots spanning 2012–2026, covering 15 years.

Regulatory Verification Notes

The About, services, client, contact, and product materials provide a coherent commercial identity and describe an established IT-services model. The available evidence supports an apparently legitimate business presence, but the real-world operator identity is not independently verified. No licence claim, registration number, or sector-specific authorisation was identified on the reviewed pages; for a general software-services business this is a disclosure and verification point rather than a scam indicator. The site's transport security is valid, although domain validation provides encryption and control validation rather than proof of corporate identity. Evidence:

- The homepage and About content describe rajIT Solutions Ltd. as operating from Rajshahi, Bangladesh, with activity since 2005.
- The registration record lists PDR Ltd. d/b/a PublicDomainRegistry.com as registrar, with an expiration date of 2027-02-23T14:00:16Z.
- The site is served from AS199404, WHG-IN - WHG Hosting Services Ltd, GB.
- The TLS certificate is issued by YR1 at DV validation level and is valid to 2026-10-02T05:40:53+00:00.

What to Verify Next

Before a high-value contract, sensitive data transfer, or material payment, the prospective counterparty should independently confirm the company's legal registration and any licensing applicable to the specific service being purchased. The contact page should be cross-checked through an independently sourced business record or offline channel, and client references, service scope, support obligations, refund terms, and data-processing responsibilities should be documented in the commercial agreement. Evidence:

- The site provides a Contact page and quotation/demo forms suitable for confirming the proposed business engagement.
- The Services and Products pages define the intended scope of work and should be reconciled with any statement of work or purchase order.
- The Clients and About pages provide the stated business and reference context for independent corroboration.

Summary Verdict

The overall posture is **moderate trust**. Available evidence is consistent with an established, apparently legitimate corporate website, and no scam or impersonation contradiction was observed. Confidence remains qualified because the real-world operator identity has not been independently verified.

Infrastructure Integrity

The site resolves directly to a single likely origin endpoint, with no detected CDN or WAF layer and no edge-IP separation. This reduces the benefit of intermediary protection and should be treated as a limited infrastructure-mitigation factor, not as evidence of illegitimacy.

Closing Assessment

Routine browsing and service evaluation are proportionate, while independent counterparty and transaction checks should precede sensitive engagements or high-value commitments.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 24 reports on hosting IP 190.92.174.248 (WHG Hosting Services Ltd, Data Center/Web Hosting/Transit), 87% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rajit.net.

- The request stayed on rajit.net. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by supercp.com, across 4 name servers. NOTED
- The registration is paid up to 2027-02-23. NOTED
- The earliest public archive of this site is from 2012-05-20. CLEAR
- It is hosted on WHG-IN, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rajit.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
