

Is rappi.com.co legit? TrustSniffer's high-trust assessment: 80/100

rappi.com.co

Verdict

80

OUT OF 100

HIGH TRUST

rappi.com.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 75%.

What this site appears to be

Spanish-language landing page for a food-delivery marketplace (Rappi) with links to app stores, sections to join as courier or register a restaurant, lists of popular chains, country list, and standard policy/footer items.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What rappi.com.co served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a Spanish-language Rappi Colombia food-delivery marketplace that presents restaurant ordering, promotions, mobile-app access, courier recruitment, and restaurant or merchant registration, with the apparent business model of connecting customers, restaurants, and delivery personnel.

Scam/Impersonation Risk

No contradictions were observed: the supplied evidence contains no phishing, impersonation, malicious-reputation, or blacklist findings. The homepage's login function is presented alongside ordinary marketplace content, and the captured behavior showed no hidden forms, external password forms, wallet activity, cloaking, or untrusted form destination. The site's established registration continuity, substantial historical presence, and clean external reputation are consistent with an established website, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage is titled “Pide Comida a Domicilio y mucho más - Rappi Colombia” and contains restaurant, courier, merchant, app-download, promotion, and policy content.
- The domain was registered in 2015 and is approximately 11.5 years old; the registrar is GoDaddy.com, LLC.
- The web archive records 1,843 snapshots spanning 2018–2026, covering 9 tracked years.
- External checks evaluated the site as malicious: 0 malicious detections, 0 suspicious detections, and no Google Safe Browsing or external-blacklist finding.

Regulatory Verification Notes

The site presents a conventional commercial marketplace rather than a business model that inherently requires the regulatory disclosures associated with financial services. Its footer includes policy and cookie materials, and the page links to mainstream app stores and social platforms. No licensing or registration number is presented in the supplied site material; this is a transparency item for ordinary merchant-identity verification, not evidence of fraud. Registration privacy through Domains By Proxy is an administrative detail, and the available evidence supports apparent legitimacy without independently proving the operating legal entity.

EVIDENCE

- The homepage includes cookie, privacy, and standard policy/footer content.
- The site’s hosting infrastructure identifies AS16509, Amazon.com, Inc. (AMAZON-02), US.
- The site uses a valid Domain Validation TLS certificate issued by Amazon RSA 2048 M01, valid through 2027-01-24.
- No match was found in the supplied third-party broker-reputation dataset.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm that the merchant identity, customer-support channels, refund and return terms, and payment-protection arrangements correspond to the intended Rappi service. App installations should be initiated from the platform’s official app-store listings, and any material commercial relationship should be documented through independently confirmed business contacts. Where licensing or registration is relevant to a particular service or jurisdiction, the applicable registry should be checked directly.

EVIDENCE

- The homepage provides links to Apple App Store, Google Play, and Huawei AppGallery.
- The homepage exposes separate paths for customer login, courier registration, restaurant registration, and merchant onboarding.
- The site provides policy and cookie-information links that can be reviewed before account or transaction activity.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate website. The classification is supported by strong convergence across site content, historical continuity, technical integrity, and external reputation, while the operator’s real-world identity remains not independently verified.

Infrastructure Integrity

The site is protected by AWS CDN/WAF infrastructure, with observed traffic associated with AS16509 edge servers; the origin server was not observable in this analysis. This architecture reduces direct exposure of the origin and is a mitigating infrastructure signal, but it is not, by itself, proof of legitimacy.

Closing Assessment

Normal browsing is proportionate to the assessed posture; account login or payment activity should proceed only after the ordinary independent merchant-identity, policy, and payment-protection checks appropriate to the transaction.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rappi.com.co.

- The request stayed on rappi.com.co. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by awsdns-61.net, across 4 name servers. NOTED
- The registration is paid up to 2030-02-16. CLEAR
- The earliest public archive of this site is from 2018-09-01. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rappi.com.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
