

Is rappi.com.mx legit? TrustSniffer's high-trust assessment: 97/100

rappi.com.mx

Verdict

97

OUT OF 100

HIGH TRUST

rappi.com.mx appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Commercial front page for Rappi Mexico: app download prompts, restaurant and store categories, recruitment links for couriers and merchants, promotions, and legal/policy links.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Rappi México is a consumer delivery marketplace connecting customers with restaurants, supermarkets, pharmacies, stores, couriers, and related services through web and app channels, with an apparent business model based on delivery fees, commissions, promotions, and merchant partnerships.

Scam/Impersonation Risk

No contradictions, phishing indicators, or brand-impersonation signals were observed. The homepage presents a coherent consumer-commerce model, including food delivery, grocery and pharmacy ordering, courier recruitment, merchant onboarding, promotions, and app access, rather than an anomalous financial or investment proposition. Automated interaction showed external network activity and console errors, but the observed implementation had no hidden forms, sensitive external password forms, wallet connections, wallet-drainer activity, clipboard hijacking, or cloaking; these signals are therefore consistent with ordinary site operation rather than an abuse pattern. External reputation checks also returned clean results, and the site has an established traffic footprint. Evidence:

- The homepage describes restaurant, supermarket, pharmacy, express, store, travel, card, merchant, and courier services, with no red-flag content recorded.

- The homepage behavior showed no hidden forms, password submissions to external destinations, wallet-provider activity, or brand-impersonation classification.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and 0 abuse reports; the domain ranked 38224 and was within the top 1 million sites.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate consumer marketplace, although the real-world operator identity is not independently verified. The site presents legal and policy links and a cookie notice, but the supplied homepage content does not show a corporate registration number or licensing claim. Because the observed business model is consumer delivery rather than a regulated financial service, this is a disclosure point for ordinary merchant-identity and consumer-protection checks, not evidence of deception. The domain is long-established, registered through GoDaddy.com, and supported by valid transport encryption issued by a known certificate authority. Evidence:

- Registration records show creation on 2015-10-12, with an age of 10.85 years, and registrar GoDaddy.com.
- The site's TLS certificate is DV, issued by Amazon RSA 2048 M01, and valid through 2027-02-28T23:59:59+00:00.
- The homepage contains legal and policy links and a cookie notice describing necessary cookies, third-party technologies, personal-data processing, analytics, and preference-based advertising.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the responsible merchant entity, applicable consumer-commerce registrations or licensing, return and cancellation terms, and available payment protections using the legal and policy materials as the starting point. Contact channels should be confirmed through an independent, offline route where a transaction or account dispute would carry material financial impact. Evidence:

- The homepage provides direct access to legal and policy materials that can be used to review contracting, privacy, cookie, and consumer-service terms.
- The site supports account access, app download, merchant registration, and courier registration, creating distinct identity and transaction paths that should be matched to the applicable terms before use.

Summary Verdict

The overall posture is **high trust and low risk**, with converging evidence consistent with an established and apparently legitimate website. The classification supports normal browsing and ordinary service interaction, while the operator identity remains likely rather than independently verified.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, with observed addresses belonging to Amazon edge servers rather than a directly exposed origin. This is a mitigating infrastructure control that reduces direct origin exposure, but it is not independently proof of legitimacy. Evidence:

- Verified server telemetry identified AS16509, Amazon.com, Inc., US; CDN infrastructure identified AS14618, AMAZON-AES, Amazon.com, Inc., US.
- Three CDN edge addresses were observed, with 3 edge IPs and 0 likely origin IPs.
- Infrastructure resolution status was resolved, with AWS detected as the CDN/WAF provider.

Closing Assessment

Routine use is proportionate to the assessment; before submitting credentials or making payments, independently confirm the merchant identity, applicable terms, return protections, and payment-dispute safeguards.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rappi.com.mx.

- The request stayed on rappi.com.mx. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com. CLEAR
- DNS for this domain is served by awsdns-56.org, across 4 name servers. NOTED
- The registration is paid up to 2027-10-12. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rappi.com.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
