Full analysis

Overview

The website is a minimal “coming soon” landing page branded “RAYO CÓSMICO,” presented through GoDaddy as a parked domain awaiting future development; it currently offers no identifiable service, product, account function, or financial interaction.

Scam/Impersonation Risk

The site itself does not display a login page, payment request, offer, or other active solicitation, and no page-level impersonation indicators were identified. However, this benign presentation does not resolve the stronger external contradiction: the domain has recorded malicious detections and confirmed blacklist hits from multiple external sources. The resulting posture is therefore materially elevated despite the absence of active functionality on the current homepage.

EVIDENCE

- External reputation assessment recorded 4 malicious detections and a confirmed blacklist status for the domain.
- Domain registration record: registered 2021-12-03, approximately 4.72 years old, through GoDaddy.com, LLC.
- Historical web captures span 2021-12-22 through 2025-07-14, representing 5 years tracked.
- The homepage is a GoDaddy-powered “coming soon” page with no forms, login mechanism, or transactional offer.

Regulatory Verification Notes

The available page provides no operating-company identity, regulatory status, license number, or substantive terms for a business activity. Because the site is only a parked placeholder, this is principally a verification and disclosure gap rather than independent proof of misconduct; nevertheless, the operator cannot currently be independently connected to a real-world entity from the supplied site content. The absence of a broker-dataset match is contextual only and does not establish authorization or legitimacy.

EVIDENCE

- The homepage contains only “RAYO CÓSMICO,” “Great things are coming soon,” “Stay tuned,” and GoDaddy attribution.
- No legal, licensing, terms, privacy, contact, or corporate-information pages were identified in the supplied page analysis.
- The site’s transport encryption is a DV certificate issued by WE1, valid through 2026-11-01.
- Hosting resolves through AS209242, identified as CLOUDFLARESPECTRUM - Cloudflare London, LLC, US.

What to Verify Next

Before any future launch-related engagement, an independent party should confirm the operator’s legal name, registered address, applicable authorization, and customer-support channels through authoritative registries and independently obtained contact details. Any later request for credentials, payment, or other sensitive information should be assessed only after the domain’s external reputation status has been rechecked and the business identity has been corroborated.

EVIDENCE

- The current homepage presents no operator identity against which authorization can be matched.
- The current site has no sensitive forms, wallet connection, password submission, or payment workflow.
- The page is classified as a placeholder or parked-domain landing page rather than an operating service.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The apparent placeholder status limits current exposure, but it does not offset the confirmed external reputation contradictions or the lack of an independently verified operator identity.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer for network exposure, but it is an infrastructure control rather than evidence that the website or its future operator is legitimate. The observed address is an edge endpoint, and no origin candidate was identified in the infrastructure analysis.

EVIDENCE

- Cloudflare CDN/WAF protection is present on the website.
- One edge address was observed; no likely origin address was identified.
- The infrastructure assessment records the service provider as CLOUDFLARESPECTRUM - Cloudflare London, LLC, US.

Closing Assessment

Passive viewing of the current placeholder page presents limited immediate interaction exposure, but credentials, payments, and other sensitive actions should not be undertaken unless the operator and any applicable authorization have first been independently confirmed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page sent data to a destination TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rayocosmico.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
